REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 14. THE REDCLIFF REVIEW, THURSDAY, NOV. 5, 1925. Number 44.

Conservatives Still Have Largest Group in House

FIGURES NOW STAND CONSERVATIVES 117, LIBERALS 100, PROGRESSIVES 23, LABOR 2, INDEPENDENTS 1—TWO SEATS STILL IN DOUBT—ONE IN QUEBEC AND ONE IN MANITOBA.

Latest dominion election returns show that in the last few days the Conservatives won one and lost one so that their total still stands at 117. The junior seat in Queens, P.E.I., was moved from the doubtful to the Conservative column after a check up by the deputy returning officer. J. Meservey, Conservative, has a majority of 2b over J. B. Sinclair, who was minister without portfolio in the King cabinet. This makes nine defeated ministers. Balancing this the Conservatives lost in Nipissing which was previously classed in their column. In the latest counts the Liberals also broke even. While they won in Nipissing, Ont., Bonaventure, Que., is now transferred to the doubtful column with the Conservative leading. Provencher, Man., is still in doubt with the Progressive leading the Liberal candidate by 118. In this latter constituency a recount has been ordered and will take place Nov. 9th. Peace River, Alta., which was in doubt for several days is now conceded to the Conservatives.

The following is the latest summary by provinces:

	Lib.	Con.	Pro.	Lab.	Ind.	D'et	Tri.
P.E.I.	2	2	0	0	0	0	2
N.S.	1	10	0	0	0	0	11
N.B.	8	11	0	0	0	1	10
Que.	59	4	0	0	1	1	65
Ont.	12	68	2	0	0	0	82
Man.	7	7	3	0	0	1	17
Sask.	15	0	6	0	0	0	21
Alta.	4	4	8	0	0	0	16
B.C.	3	10	4	2	0	0	19
Y'kon	0	1	0	0	0	0	1
T'tal	100	117	23	2	1	2	245

Since the above was in type, the doubtful seat in Quebec has gone Liberal, making the total Liberal supporters now 101. The others are unchanged.

Success of New Weed Cleaning Machine

Is Being Sponsored by Hon. George Hoadley of Edmonton

Demonstrations of the perfected Weed-cleaning machine which is being actively conducted by Hon. Geo. Hoadley, minister of Agriculture and his department, have taken place at one or two points in the province within the past few weeks.

During the past week or two, however, several local men, the machine in operation at Oliver, near Edmonton, and at other points, and have declared their entire satisfaction with it.

The machine, which is considerably improved and lightened over the first model, is attached to the top of the grain separator, and cleans the grain free of weed seeds and small grain, before it goes to the bin or wagon.

The device weighs some 60 pounds, and is driven by a belt from the header shaft. Only from 1 to 1½ horse power is necessary to drive the machine, and it has a capacity sufficient to permit it to handle the run of grain from any make of separator now in operation in the west. The excessive amount of vibration which was an undesirable factor in the first model of the invention, has now been successfully overcome. It is expected that the provincial department will direct the marketing of the machine next season, on a basis that will make it easily possible for separator men to finance.

The invention is declared by grain men and farmers to be the greatest step forward yet taken in the control of weeds on the farm and the reduction of dockage in the marketing of the grain.

SENATOR DAVIS WANTS TWO PARTIES TO JOIN

In an article written especially for the French language newspaper La Patrie, Senator L. O. Davis discusses the present political situation and declares there is a feeling in certain quarters that sooner or later an "entente between Liberal and Conservative elements will be necessary in order to put an end to a political and national situation injurious to the peace and harmony which is now more than ever necessary for the country."

WANT IMMIGRANTS INSPECTED IN ENGLAND

The women's section of the Canadian Council of Agriculture, at its session yesterday, presented a report to the meeting, which was adopted. It contained the statement that a recommendation that trained psychiatrists examine all intending immigrants before they are passed for immigration, had been acted upon, and that Canadian doctor, responsible to the Dominion department of health, will be stationed in London for this purpose.

Mrs. J. Kallis Passes Away Sunday

Leaves Husband and Seven Small Children

Although it had been known for several days that Mrs. J. Kallis was passing through the Valley of Shadow, the news of her death last Sunday cast a gloom over all who were conversant with the circumstances. Three weeks ago deceased gave birth to her eighth child after which complications set in and she gradually grew weaker until the silver cord was loosed and she passed to the Great Beyond. The infant died shortly after birth

Deceased was only 35 years of age. Besides her husband, she leaves seven small children.

The funeral took place last Monday and was conducted by officers of the Salvation Army.

LOCAL NEWS AND ADVS. ON PAGE 4

Owing to change in make-up of the paper this week the local news and local advs. usually appearing on the back page, will be found on page four. Because of this our editorial columns are crowded out.

Churches

GORDON MEMORIAL UNITED CHURCH

R. N. Matheson, B.A., Minister

Dear stranger: If your home church is not in town Gordon Memorial folks will be glad to welcome you to share in their activities and service.

Organizations of Congregation meet—

Official Board, Second Tuesday of each quarter.

Communion Service, Second Sunday in each quarter, at 11 a.m.

Ladies' Aid, Thursday afternoon at 3 o'clock, except last Thursday of the month.

Women's Missionary Society, the last Thursday afternoon of each month at 3 o'clock.

C. G. I. T., Tuesday 6:00 p.m.

Willing Workers' Mission Band, the First and Third Mondays of each month at 4:15 p.m.

Sunday, November 7th—
10:00 a.m. Church School.
11:15 a.m. Morning Worship.
Thanksgiving Service subject: "What Shall I Render?"
7:30 p.m. Evening Service.
Subject: "The Peril of Resisting"

ST. AMBROSE CHURCH

Rev. J. L. Cooper, B.A., Vicar

22nd Sunday after Trinity, Nov. 8—
Holy Communion in Parish hall at 8 a.m.
Bible Class at Vicarage, 10 a.m.
Mattins and Sermon, 11 a.m.
(Evensong at St. George's, Irvine, 3 p.m.)
Evensong and Sermon, 7:30 p.m.
Monday, Nov. 9—(Thanksgiving Day)
Service in church after parade.
Wednesday, Nov. 11—Armistice Day.
Holy Communion, 8 a.m.
Mattins and Commemoration 10:45.
I.W.A. united meeting (visit of Deanery President) in Parish hall at 4:15 p.m.
Confirmation class at Vicarage at 8.
Thursday, Nov. 12—W. A. meeting in Parish hall, 2:30 p.m.
Friday, Nov. 13—Evensong at 7:30, followed by Choir practice.

CHURCH OF THE BRETHREN

Sunday School, 10:30 a.m.
Usual services will be held.

ST. MARY'S CHURCH

Celebration of Mass 2nd and 4th Sundays of each month at 8:30 a.m.
by Rev. Father Fitzpatrick.

RT. HON. ARTHUR MEIGHEN

Leader of the Conservative party who was elected by his old constituency of Portage la Prairie, and now leads the largest group in the house.

Arrangements Made For Memorial Service Here Next Monday

If Weather Favorable Service held at Cemetery, if Not, in Theatre—Procession to Form at 10 o'clock a. m.

On this, our nearest edition to Armistice Day anniversary, we reprint the list of those from Redcliff who made the supreme sacrifice during the Great War. They are as follows:

J. Lavelle, W. Connell, W. Estes, J. Edwards, H. Hodge, J. Holland, A. Hussby, L. Webberburn, D. McLuckie, G. Johnson, B. Jones, J. Thornton, J. Walker, L. Wilde, A. Cann, J. Jones, L. Bole, W. Rae, S. Miller, C. Walker, J. Crompton, R. Dunstire, J. Leach, J. Reynolds, F. Woolcock, W. Henderson, J. Poiets, L. Ronald, G. Smith, J. Sadden, J. Jones, S. Berthwick, J. Brayley, E. Cameron, T. Chambers, M. Chapman, C. Johnson, W. McLean, J. Kirkpatrick, R. Lang and W. Neale.

The committee in charge has now everything lined up for the Memorial Day Drumhead Service which is to be held here next Monday morning under the auspices of the local branch of the G. W. V. A.

The arrangements are that all returned men and members of the band meet in the local armory at 10 o'clock in that morning. Citizens are asked to assemble at the Cameo theatre at the same hour. Should weather permit the procession will be formed at the theatre and march to the cemetery where the service will be held and graves of departed comrades decorated. The band will lead the procession and will be followed by returned men, the clergy and citizens. Those using cars will follow in the rear.

Should the weather be cold or stormy the service will be held in the Cameo theatre. This will be decided upon before the procession is formed.

In either case the order of the service will be as follows:

Invocation, by Rev. R. N. Matheson.
Hymn, "Onward Christian Soldiers.'
Address, Rev. R. L. Cox.
Hymn, 'O God our Help in Ages Past.'
Address, Ensign Bortree of Salvation Army.
Hymn, 'Light the Good Fight.'
Address, Rev. Matheson.
Hymn, 'Lead Kindly Light.'
Address, R. C. Cooper.
God Save The King.
Benediction, Rev. Cooper.
Placing of Wreaths on Graves.
The Last Post.
The band will lead the singing.

It is hoped the returned men will turn out one hundred per cent. strong and that the citizens generally will show their appreciation of this effort on the part of the local G. W. V. A. by turning out in large numbers.

"Lightnin'" Hits Town Next Monday

Fascinating Film to be Shown at the Cameo Theatre.

"Lightnin'" will strike this town next week! This is not merely a prediction; it is a certainty. However, it will not be serious. On the contrary it will be highly entertaining, because "Lightnin'" will hit here as one of the season's most promising photoplays, being booked as the attraction at the Cameo theatre, Monday. Jay Hunt will be seen in the title of Lightnin' Bill Jones, a character made J. Hadley famous by the late Frank Bacon, on the stage. Supporting Hunt will be Madge Bellamy, Ethel Clayton, Edythe Chapman, Otis Harlan, J. Farrell MacDonald, James Marcus, Wallace McDonald Brandon Hurst and Richard Travers.

Ex-Service Men to Meet in Med. Hat

Invitation Extended to Redcliff Men to be Present

At the request of Lieut.-Gen. Sir Richard Turner, Toronto, Col. R. S. Sanders, D.S.O., of Calgary, a meeting of all ex-service men will be held in the G. W. V. A. hall, Medicine Hat Friday, November 6, commencing at 8:15 p.m.

The meeting is not called under the auspices of any existing organization and its purpose is to discuss the question of a possible world-wide organization for all ex-members of the force as outlined by Earl Haig in his recent visit to Canada; to appoint a local unity committee; to consider the matter of appointing delegates to the Imperial Conference to be held in Prince Arthur on November 20th next.

An invitation is extended to all ex-service men in Redcliff to attend this meeting.

Weekly News Bulletin

Issued by Publicity Commissioner, Government Buildings, Edmonton

New Lieutenant Governor

Alberta's new Lieutenant Governor is Dr. William Egbert of Calgary, whose appointment to the position was made the past week. The new governor took the oath of office on Thursday. Dr. Egbert succeeds Dr. Brett, who had been governor for the past two years. He is a resident of Calgary of many years' standing.

Schools of Agriculture Open

The provincial schools of agriculture at Vermilion, Olds and Claresholm have opened for the 1926-26 term, with an attendance which will total upward of 350 when all students have arrived. The schools are anticipating the heaviest registration in their history. The parties of British boys who are to train here under the Hoadley scheme, have been distributed with 24 at Claresholm, 20 at Olds and 22 at Vermilion.

* * *

Swine Club Contests

Some forty boys and girls between the ages of fourteen and eighteen, members of boys' and girls' swine clubs from eleven different districts in the central and northern part of the province, will attend the third annual swine club show which will be held in Edmonton on November 5 and 6. In addition to exhibiting the pigs which they have reared for their contest season, these farm boys and girls will take part in two judging competitions.

The swine clubs are established under the direction of the Provincial Department of Agriculture.

* * *

Swedish Delegation

One of the most interesting parties from abroad to visit the province this year came last week in the persons of a Swedish delegation to the international parliamentary conference at Washington recently. The delegation visited Edmonton on Saturday last, and met officials of the provincial government and others. The delegation included David Bergstrom, formerly consul general for Sweden in Canada, and also Swedish ambassador to Japan, who is a member of the senate of Sweden, and has been a member of one or other of the Swedish parliamentary assemblies for the past 25 years. Dr. Ivar Afzelius, M.P., was the other member of the delegation and H. E. Hallin of Stockholm accompanied them as secretary.

Local Option Votes

A total of twelve local option votes have now been held in the province. And of that number, four have been "wet" and the balance of eight dry.

The largest "wet" vote was recorded at Sturgeon, where the vote was 401 for, to 387 against. The other localities to vote wet were Isley, by one vote; Langdon and Shepard where the vote was 312 for, and 322 against, and Okaton where the vote was 13 for and 14 against.

The communities voting drw were as follows: Bentley, 74 to 23; Galahad, 26 to 25; Cayley, 40 to 10; Parkland, 103 to 102; Irma, 55 to 11; Lethbridge, 25 to 13; Fleet, 11 to 6; Kinsella, 148 to 95.

* * *

Horse & Cattle for Chicago Exh.

The following are the exhibitors who have been selected to make horse and cattle exhibits to Chicago International Stock Show in December: Percherons, 12 head; Shire, 1 head; Shorthorn, E. P. Ranch, 1 head; Aberdeen Angus, R. Henderson, 1 head; Percheron horses, E. A. Davenport, 10 head; Bar U Ranch, 2 stallions; Bellgians, Wm. Urquhart, 1 mare; University of Alberta, 16 head. The provincial department of agriculture in accordance with its policy of encouraging these exhibits, will pay the carrying charges on the exhibits to Chicago.

SCHOOL NEWS

The Hallowe'en party put on by the first year students last Friday evening in the form of a box social, was a success and a good time was had by all present. Mr. Stone, the Honorary President, auctioned off the boxes, and the neat sum realized was donated to the Literary Society.

Several students have lately registered for the art course and in all there are now thirty-one courses in ars being taken. When these students registered for the art course they moved up into the next unit class.

Stanley Rogers of Liverpool, Eng., will hold a public lecture under the auspices of the International Bible Students Association in Cliff hall, on Monday evening, November 9th. Mr. Rogers is a widely travelled speaker having spoken on spoken considerably in Europe, and will thus be able to deliver an interesting lecture. The lecture starts at 7:30 p.m.

King Decides To Carry on and Calls Parliament

MAKES ANNOUNCEMENT FOLLOWING CABINET MEETING—HOUSE TO MEET AS SOON AS IT IS LEGALLY POSSIBLE—WILL HAVE BYE-ELECTIONS FOR MINISTERS AT ONCE.

Premier King and his advisers decided at a cabinet meeting yesterday to remain in power and to call the house together at the earliest possible moment. In his statement premier King says:

"After several interviews with His Excellency at which the position brought about by the recent general election was fully discussed, and all alternatives presented, I have taken the responsibility of advising His Excellency to summon parliament for the earliest possible date in order to ascertain the attitude of the parliamentary representatives towards the very important question raised by the numerical position of the respective political parties. His Excellency has been pleased to accept this advice."

This decision involves the selection of a cabinet and will mean a number of bye-elections to endorse the cabinet selections. Since this is necessary it will be a few months before parliament will meet.

"Limited Mail" is A Film Thriller

Old Stage Melodrama Said to be Most Exciting of New Pictures

"The Limited Mail," the Warner Bros. feature of the Screen which shows at the Cameo theatre on Friday, is a picturization of Elmer Vance's thrilling melodrama of the West, directed by George Hill.

The story concerns the fortunes of Bob Stanton (Monte Blue) a never-to-well Easterner who turns tramp and joins forces with Spike (Edward Gibson) and Pete (Willard Louis), two others of the care-free brotherhood. When the three save the H.H. Murphy Limited Mail from destruction by a mountain landslide, Jim Fowler (Tom Gallery), the mail clerk strikes up a friendship with Bob.

Together the two men bring up Bob's motherless little son Bobbie (Jackie Huff) and together they fall in love with Caroline Dale (Vera Reynolds), an attractive little waitress. Bob's past in the form of a chorus girl returns to disturb his romance, but further complications result when Jim is killed in a wreck due to Bob's carelessness in missing a danger signal. Bobbie falls into a stream when he follows Bob in his grief-stricken wanderings, and the man sacrifices the boy to rescue the Mail Train from a landslide.

ROBERT GARDINER

Former federal member for this constituency, whose election is conceded in Acadia. He is now leading by over a thousand with only a few small polls to hear from. It is expected both his opponents will lose their deposits.

Election Has Left Country In Bad Shape

NO PARTY HAS SUFFICIENT FOLLOWING TO CARRY ON SUCCESSFULLY—KING AND MEIGHEN HAVE NOT YET ANNOUNCED FUTURE PLANS.

Several weeks ago the Review stated that the dominion election which was then in progress, was one of the most important held in Canada for many years and ventured the prediction that its results would be one of the most serious unless either of the old parties had sufficient majority to carry on without depending upon any other group.

Now the election is over and all are agreed that the result is most serious.

Opinions differ as to just what leader should be called upon to form a government under present condition. Whichever leader it may be he will have his disadvantages as well as his advantages and it is just a question if the former will outweigh the latter.

In his first speech, announcing the dissolution of parliament and the date of the election, premier King said the reason he was appealing to the country at this time was because he was unable to fulfil his pre-election promises because he had not enough Liberals in the house, and he was going to the country for a mandate from the people to enable him to carry on successfully. He appealed to the people and the people did not give him that mandate. Even in premier King and his party lost ground in very province in the Dominion save one. That was Saskatchewan. Mr. King was defeated in his own constituency and eight of his cabinet ministers were defeated. With that mandate from the people how could any leader expect to be asked to carry on.

Mr. King also stated in his campaign speeches that if he did not get a clear majority over all he would immediately resign and go back to the country.

The Progressives also lost ground. They had 61 members in the last house and only 23 were elected last Thursday. The Conservatives had 49 members in the house before the election, and they have 117 now. Of all the parties the Conservatives alone made gains. Their start into the contest with a record of 96 to Quebec against them was like starting two fairly evenly matched horses in a mile race, and giving one of them a quarter of a mile handicap.

Despite this handicap, however, the Conservatives have been returned in the largest numbers with sweeping majorities in almost every instance.

Under these circumstances it is to figure out any grounds upon which Mr. King would be justified in continuing in office as it is rumored he intends doing.

On the other hand what could Mr. Meighen do if called upon to form a government with a group 117 members behind him and the combined forces of 128 against him. The term of his government would be short and extremely difficult to handle. One thing is to his favor, however, is that a large number of the Quebec members, although Liberals, are protectionists, and at least one Liberal elected in Ontario is also a protectionist. There no doubt are others in that industrial province. Since W. Wood has issued his instructions to Progressive members elected from Alberta it can hardly be expected that these members will rush to the support of any administration in particular. Looking at the situation from every angle, Meighen would appear to be the logical man to be asked to form the next government, no matter what consequences, since government of the country must be carried on by some party.

GORDON MEMORIAL UNITED CHURCH

The musical drama, entitled "A Dream of Fairyland," given on Monday evening in Gordon Memorial United Church, by members of the Mission Band proved to be a genuine treat and was thoroughly enjoyed by parents present. Twenty-four little girls, all in pretty fairy costumes, took part and during a continuous program which lasted for more than an hour and a quarter scarcely an error was detected. Some had more conspicuous parts than others but to mention any name would be to do an injustice to those who were not mentioned. The girls all sang sweetly and did their respective parts very beautifully indeed. Many requests have already been made that the program be repeated. The group was trained by the President, Mrs. Matheson, with Miss Hicks at the piano.

On Tuesday evening the C. G. I. T. entertained about fifty young people at a Hallowe'en social. The hall was suitably decorated and a happy evening was spent with music, games, stunts, good fellowship and lunch. The boys are discussing the possibility of introducing a few extra Hallowe'ens during the calendar year.

Mr. Wm. Henderson, Redcliff's "grand old man," now in his 87th year is a member of the first Alberta Conference of the United Church of Canada, which is in session this week in the city of Calgary.

RED ROSE COFFEE "is good coffee"

Confidence--A National Keystone

Evidence accumulates of the tremendous impetus which the 1925 crop of Western Canada is giving to business throughout the length and breadth of the Dominion, while paving the way for still greater increases and expansion. Almost every day the daily newspapers tell of some new record established. Both the C.P.R. and Canadian National are loading larger numbers of cars daily with grain than ever before in their history; with the result that the stream of wheat pouring into the terminal elevators is surpassing anything hitherto experienced in this country.

The Saskatchewan Co-operative Elevator Co., the largest initial wheat handling company in the world, recently took in 1,200,000 bushels in one day, where as in no previous year did it quite reach the one million bushel mark.

Another most gratifying feature of this year's crop is that the actual yield per acre is not only coming up to the earlier estimates, but, taken on the whole, those estimates are being exceeded. In the matter of grade, too, the out-turn is highly gratifying, this year's crop grading higher than in any previous year. Not only is a very high percentage of contract grades, but at least half of the contract grades in Saskatchewan is reported as No. 1 Northern.

The large increase in wheat production in Canada this year, the satisfactory yield per acre, the good grade, and the substantial price is becoming well known throughout the United States, where the crop this year has fallen away below the average. As a result a movement of United States farmers to Western Canada has already begun.

The 1925 crop has also provided a final and conclusive reason for such an old established concern as the Hudson's Bay Company to take active steps to carry into effect its pre-war policy of extending operations throughout the West. The H. B. Company has, therefore, commenced building operations on a new $5,000,000 store in Winnipeg, is enlarging its store in Vancouver, has purchased additional property to provide extensions at Calgary, Edmonton and Saskatoon, and has just concluded the purchase of an extensive site for a store in Regina.

These are some of the outward and tangible evidences of the renewed confidence in Western Canada which is now felt by everybody. That restored confidence is, in fact, the most valuable asset of all. It means more to our people and to this country and its future than all the millions of dollars of new wealth which the crop itself represents.

While the West was passing through the past few trying and difficult years, there was an all too general tendency towards pessimism and in the direction of decrying the country itself. When times are rather hard, and people are looking at the blue side of things, they are apt to forget that all countries have periods of depression, and that every year cannot be a "good" year. This year's crop, however, has demonstrated that Western Canada, as a country, is all right, and as a result the people are taking heart. There will be no boom, but there will unquestionably be a newer and firm confidence.

And confidence is, let it be repeated, a real and vitally important national asset. Lack of confidence on the part of the people of Canada individually has, in the past, been an outstanding national weakness. In the planning and execution of great national undertakings Canadians have displayed confidence, but all too frequently in their individual capacity and enterprises they have been timid and fearful to venture. Such lack of confidence has been more in evidence in the East than in the West, although this section of the Dominion has not lacked croakers and prophets of blue ruin.

This year the West is not only proving to its own people what it can do, but it is demonstrating to all Canada and the world at large that under normal conditions it can provide the means to keep all the wheels of industry turning.

2 Years' Backache Subdued by "Nerviline"

"Backache was the bane of my life, and for two years I was so laid up I could be unfit for work," writes E. S. Sloane, from Georgetown. "While in Smith Bros. Drug Store, I heard of Nerviline being a wonderful pain-destroyer, so I decided to try Nerviline. Thanks to Nerviline, my two years' backache was rubbed away, and to-day I am perfectly well."

All those who suffer from weak, aching backs, those whose muscles are stiff, whose joints are weak, let them try Nerviline—the liniment that never fails. 35c at all dealers.

Spoiled It All

Just about the time the scientists became hopeful of being able to prolong the span of human life, the automobile was invented.

Granite is called the Mother Rock because it is the lowest rock in the earth's crust. Granite shows no evidence of animal or plant life.

New Holstein Sales Service

Prospective Buyers Notified Where Cattle Are For Sale

The Holstein-Friesian Association of Canada, through their fieldman, Mr. R. M. Holtby, Port Perry, Ont., are providing a special sales service for prospective buyers of Holstein cattle. It is intended to help the small breeder by letting prospective buyers know where cattle are for sale.

The Beldman will visit established herds and report on the cattle offered for sale, as far as necessary, but in order to give buyers definite information on the quality and breeding of the cattle offered.

Value of Early English Coin

The noble was an English gold coin of the Middle Ages. Its value was 6s. 8d., which in Canadian currency would be equal to $1.63, but the purchasing power of money then was more than twice that of today. The noble was first coined in the reign of Edward III., 1343. It derived its name from the excellence of the gold of which it was composed.

A group of American tourists recently were entertained three days free of charge in a Swedish jail—but they left a tip large enough to pay the bill.

MOTHER:— Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

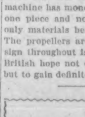
To avoid imitations, always look for the signature of Chas. H. Fletcher
Proven directions on each package. Physicians everywhere recommend it.

Supremacy Of the Air

New British Seaplane Is Capable of Great Speed

The Napier S-1 which is the secret seaplane built at Southampton for the British entry in the Schneider air cup race at Baltimore, is now ready for shipment to the United States. The utmost secrecy is still preserved, but it is capable of speed of considerably more than four miles a minute. The machine has monoplane wings built in one piece and no fabric is used, the only materials being metal and wood. The propellers are metal and the design throughout is entirely novel. The British hope not only to win the cup but to gain definite air superiority.

BEAUTIFY IT WITH
"DIAMOND DYES"
Just Dip to Tint or Boil to Dye



Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in fingerings, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Thief Returns Valuable Watch

A year ago, burglars entered the home of E. F. De Bower, Chicago, president of the American Academy of Letters, through a window and stole jewelry, including a specially made $800 wrist watch that enabled Mrs. De Bower, who is blind, to tell the time. There was said to be only one other watch like it in Chicago. The other night the same window was raised and a package pushed through. It contained the watch and this note: "Jem Conners is dieing, wan you to have this and pray for him. His pal."

A Tale Of Shipwreck

Bottle Message of Tragic Import is Found After Many Months

On a little island in the centre of the Indian Ocean, far from the steamship lanes, may be lying the bones of five seamen, saved from drowning when the Mary A. Bolling, of Philadelphia, was wrecked in a storm on March 18, 1924, according to a dispatch from Brussels.

A nurse at a sanitorium at Broodone, near Ostend, found in the sands a bottle containing the following message: "Sailing ship Mary A. Bolling, from Philadelphia, wrecked in storm March 18, known latitude 83 east, longitude 10 south. Five were saved but will starve unless somebody comes soon. Please notify grandfather, P. H. Woods, 4102 Walnut Street, Philadelphia. For God's sake hurry."

The bottle, with its message of hope, travelled many thousands of miles before it was picked up in Belgium.

A Corrector of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Eclectric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

In England wedding rings, of cheaper grades, are being worn by the unmarried girls, who imagine either that the sight of the ring attracts men, or that the wedding ring protects them in public.

What Is Evaporated Milk?

Interesting Information Regarding This Important Article of Diet

While the use of evaporated milk is general all over Canada, occasionally the query is made, "What is Evaporated Milk" Evaporated Milk is nothing but fresh milk from which part of the water has been removed by evaporation. (Fresh milk is 87 per cent. water.) Nothing is added to it. Nothing but water is taken from it. This concentration makes it more than twice as rich as ordinary milk. After it is thus concentrated it is put in air-tight containers, sterilized and marketed by the grocer, the manufacturer putting his brand on it, as Borden's St. Charles Milk, for example. Milk is fresh unless it has been subjected to attack by the bacteria which destroy its freshness. (Milk, when it comes from the cow, is exposed to the air and therefore subject to bacterial contamination.) In the course of time the numbers of such bacteria increase and their action on the milk destroys its freshness. When milk becomes sour it is because the lactic acid bacteria have attacked the milk in such numbers and for such time as to develop the lactic acid that makes it sour. Evaporated Milk is concentrated at plants in the country within a few hours after it comes from the cow, the Borden Company, for instance, operating large condensaries at such dairy centres as Truro, N.S., Ingersoll and Norwich, Ontario, and South Sumas, B.C. The milk is put into air-tight containers and sterilized. By sterilization all bacteria are destroyed. The attack of such bacteria is absolutely stopped. No further bacteria can get into it. The sealed container brings it to the consumer as fresh and sweet as when it came to the country plants. It will keep fresh and sweet on the pantry shelf until the can is opened and, put in a cool place, will then keep sweet much longer after opening than bottled milk after it is delivered to the home.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Record For Wakefulness

What is believed to be the world's record for continued wakefulness was established in London recently by two experimenters who remained awake for five days and four nights, in order that a study of the effects of long lack of sleep upon the body might be made.

World's Wheat Crops

An Increase of 171,000,000 Bushels Over Last Year

Official estimates of this year's wheat crops have been received from 28 countries of the Northern Hemisphere, including every wheat growing country of importance except France. The total production of wheat in these countries is 2,519,000,000 bushels as compared with 2,348,000,000 last year, and 2,436,000,000 the average of the five years 1919-23. This is an increase of 171,000,000 bushels over last year, but it should be remembered that last year's crop was an exceptionally small one. This year's production is far below that of 1923 when the 28 countries included above produced 2,725,000,000 bushels, or 207,000,000 more than in 1925. Besides, there was an unusually small carry over of wheat in both exporting and importing countries at the beginning of the present grain year on August 1.

The September crop report of the United States indicates a yield of 700,000,000 bushels of wheat against 875,000,000 bushels last year, and that of Canada 291,819,000 bushels against 262,000,00.

Heel Holds Powder

A hollow heel that serves as a powder box has been invented in England. In appearance the heel looks like the ordinary high heel of a woman's shoe, but whenever the wearer wishes to powder her nose she simply releases a catch at the back of her shoe and the powder box heel swings down on a hinge, releasing a powder puff.

NATURE'S WARNINGS

Danger Signals That Everyone Should Take Seriously

Pain is one of Nature's warnings that something is wrong with the body. Indigestion, for instance, is characterized by pains in the stomach, and often about the heart; rheumatism by pains in the limbs and joints; headaches are a sign that the nerves or stomach are out of order. In some ailments, such as anaemia, pain is not so prominent. In this case Nature's warning takes the form of pallor, faintness after slight exertion, palpitation of the heart, and loss of appetite. Whatever form these warnings take, wise people will not ignore the fact that many diseases have their origin in poor blood, and that when the blood is enriched the trouble disappears. Dr. Williams' Pink Pills have been helpful in such cases because they purify and build up the blood to its normal strength. In this way it tones up the nerves, restores the appetite and gives perfect health. Mrs. Hazel Bernit, of Arnprior, Ont., has proved the great value of this medicine and says:—"I am a young girl and have been working in a factory for the past four years. For two years I had been in such poor health that at times I could not work. I was thin and pale, and troubled with headaches and fainting spells. I doctored nearly all this time, but it did not help me. My mother advised me to take Dr. Williams' Pink Pills, and I followed many times for a while I could notice an improvement in my condition. I used nine boxes and can truthfully say that my health is restored. When I began taking the pills I weighed 97 pounds and now I weigh 114. I feel that I owe my good health to Dr. Williams' Pink Pills and hope other ailing people will give them a fair trial."

You can get these pills through any dealer in medicine or by mail 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Makes Good Impression

J. H. Woods, of Calgary, Receives Rousing Reception in New Zealand

A wonderful impression was made on the people of New Zealand by J. H. Woods, president of the Canadian Press and a delegate to the Imperial Press conference now being held in Australia.

"He is the best speaker of the delegation," states a New Zealander, in a private letter received from Auckland. At the New Zealand Government banquet to the delegates, Mr. Woods' voice 'shook the building,' and men leaped from their seats to cheer," the writer adds.

When Asthma Comes

do not despair. Turn at once to the help effective—Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

Biggest Rose Bush

Just outside of Alhambra, Cal., the largest rose bush in the world is blooming. The tree is 56 years old and is more than four feet in circumference at the bottom and the vines have reached a length of 125 feet.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

Most people believe that diamonds will not wear out, yet those used in fine glass engraving establishments wear out within six or eight weeks.

Says Adam Died Of Gout

Adam died of the gout, says an ancient document held by the Heralds' College, of London. The document, the origin of which is unknown, but which was written in the sixteenth century, professes to trace the genealogy of the Saxon kings back to Adam and Eve.

Adam succumbed to the "gowte," it is declared, and was buried in Hebron.

Whether, if he had continued to eat an apple a day, he would have kept the doctor away, is not mentioned.

Public Shooting Grounds And More Bird Sanctuaries Have Been Established On Prairies

The department of the interior has recently set aside a number of public shooting grounds in the prairie provinces, and has added eleven bird sanctuaries to those already established there. These actions are not contradictory but complementary parts of the general plan of migratory bird conservation. Migratory birds are deemed so valuable from the standpoints of food supply, the combating of weed and insect pests, and (so far as game birds are concerned) as a means of healthful recreation, that they are protected on both sides of the international boundary under the terms of the migratory birds treaty, entered into by Canada and the United States in 1916. As one of the objects of keeping up and increasing the numbers of game birds is to provide healthful recreation for our own citizens and, further, since an important factor in attaining these objects is the co-operation of sportsmen, it was deemed advisable to prevent the complete alienation of such Dominion lands as offer facilities for shooting, and this has been done by setting aside permanent public shooting grounds in suitable localities. These shooting grounds are situated as follows: Six in Manitoba, twelve in Saskatchewan, and thirty-two in Alberta. The difference in the numbers in the various provinces is compensated for, generally speaking, by the greater size of the individual areas in Manitoba and Saskatchewan as compared with those in Alberta.

It is well known to sportsmen and bird lovers that the prairies and great plains regions contain the most important breeding grounds for wildfowl on the continent. This area embraces, speaking roughly, the provinces of Manitoba, Saskatchewan and Alberta, and a strip of territory along the northern border of the contiguous part of the United States. Here thousands of marshes and reedy lakes from time immemorial provided food and security for all kinds of waterfowl, but the progress of settlement, with the consequent draining of swamps and marshes, tends steadily to reduce the area of these breeding grounds, thereby lessening the number of wild fowl and even threatening the extinction of some species. To prevent such an occurrence suitable areas have been set aside as bird sanctuaries, that is places where birds are suitably protected and may find increase in numbers. The department of the interior has established seven sanctuaries in Alberta and eleven in Saskatchewan; and in Manitoba the federal forest reserves have been made game preserves under the provincial game act. Besides these, the Dominion Government has a number of sanctuaries in British Columbia and Eastern Canada, all of the former being administered through the Canadian National Parks Branch of the department. The provinces concerned have co-operated in respect to these refuges, and in addition other sanctuaries have been established by provincial governments, and in some cases by private individuals, all of them assisting in the conservation of this important natural resource.

Pipe Has Split Stem

Smokers who find difficulty in cleaning their pipes will be interested in a new invention whereby a pipe can be fitted with a stem that is split in halves, and so can be taken apart easily for cleaning. The two parts are held tightly together by a decorative metal band that screws on a threaded part of the stem nearer the bowl. The makers of this new pipe declare the stem to be leakproof.

New Species Of Gladioli

Considerable progress has been made during the past few years by R. M. Palmer, at Cowichan Bay, in B.C., in the cultivation and propagation of new species of gladioli. In his garden, Mr. Palmer has at present growing about 150 different varieties, bulbs having been secured from all parts of the world, even Central Africa contributing its quota to this wonderful collection.

Wheat Pool Contracts

As an example of the magnitude of the work being done by the Canada Colonization Association, it is worthy of note that the largest contracts at the present wheat and coarse grain pool in Saskatchewan, were signed up by groups of Mennonites located on lands through the medium of the association, which properties are expected to deliver a quarter of a million bushels of wheat to the pool.

He who is sorry for having sinned is almost innocent.

Danish Butter Reaches England While Fresh

Sir Thomas Clement Says Canada Holds Exports Too Long

Canadian butter and dairy produce cannot hope to compete on an equal basis in England with the Danish supplies as long as Canadian exporters hold back their stocks, said Sir Thomas Clement, president of the firm of Andrew Clement and Sons, dairy produce merchants, of Glasgow and London, who completed a flying trip of one week to the Dominion when he sailed on the Anchor-Donaldson liner, Athenia, for Scotland.

Danish exporters have the advantage over their Canadian rivals, Sir Thomas said, because their butter arrives in England about a week after it has been made, thus ensuring fresh butter to British consumers. Furthermore, the supplies are regular and can be depended upon.

This, however, cannot be said of the Canadian butter, because the supplies are irregular owing to the fact, no doubt, that Canadian exporters hold back their shipments, he said. The result is that Canadian butter arrives in England five or six weeks after it has been made.

This is not in the best interests of the Canadian dairy produce trade and, Sir Thomas Clement hoped an improvement could be made in this respect, if for no other reason than to improve empire trade.

Fattening Poultry In Crates

Fattening Fowls With Mixed Mashes to Determine Value of Preparations

At Rosthern, Saskatchewan, experimental station, an experiment was conducted three times in fattening poultry with mixed mashes in crates and the results are considered fairly conclusive. Six lots of cockerels were used in the experiment. The gain of lot one, with 26 birds in 20 days, fed cornmeal and shorts, was 35 lb. 8 oz. In each of the other lots 27 birds were used and in the same number of days the gains were: Lot 2, oatmeal and barley meal, 36 lb. 4oz.; lot 3, oatmeal and shorts, 36 lb. 12 oz.; lot 4, barley meal and shorts, 32 lb. 4 oz.; lot 5, oatmeal and feed flour, 24 lb. 12 oz.; lot 6, barley meal and feed flour, 24 lb. 4 oz. All mashes were mixed, says the superintendent in his report for 1924, with enough buttermilk to make a batter. Feed flour, he adds, makes a sticky batter and the birds do not take to it readily. Shorts and ground oats and barley are procurable on most farms, are not expensive, and give satisfactory gains.

Pasture For Pigs

Use of Pasture is Found to Effect Saving in Grain and Produce Better Results

In comparing the results of tests made at the Rosthern, Sask., experimental station, between the self-feeder on rape produce by pigs with the self-feeder on dry lot, the superintendent found the pasture lot made 0.29 pound higher gain daily while consuming 1.01 less pounds of meal per pound of gain. The use of pasture, he says, not only resulted in higher daily gains and affected a greater saving in grain, but it had a beneficial effect on the general health and thrift of the pigs. It is also worth noting that the pigs on pasture were very smooth and uniform in degree of finish when marketed, whereas the animals in dry lot were quite unthrifty in appearance and presented a great variation in size and finish at the close of the test.

Bears Menace Stock Farming

Islanders Consider Appealing to Japanese Government For Aid

It is reported from Nemuro, Hokkaido, that bears are increasing so rapidly in Yetorop, the largest island in the Kurile group, that the inhabitants are seriously considering appealing to the Japanese Government for aid. It is variously estimated that there are now between 8,000 and 10,000 bears on the island.

Hundreds of horses and cattle are killed and eaten by the bears yearly, it is said, and, unless something is done to exterminate the brutes, it is feared stock farming on the island will have to be discontinued. A bounty of 15 yen is at present given for each bear killed.

Advertising on postage stamps has been permitted by the Italian Government. The advertisers agree to turn over sixty per cent. of their receipts for the privilege.

Small Compensation

Working For Seventy-five Years For One Dollar

Much has been heard of the value of Canada's natural resources, but sometimes an incident crops up which creates the impression that we do not recognize their value in dollars and cents when their development is being considered. One incident of this nature recently came to the attention of the natural resources intelligence service of the department of the interior. It concerned the sale of a number of birch trees in a forested area, where the purchaser desired the wood of these trees only. No tree under ten inches was to be cut, while the diameters of those to be removed ranged from the minimum to twenty-eight inches. These trees had been growing for from fifty to one hundred years, they had struggled against intense competition for light and moisture, they had seen their competitors droop and die from being cut off by their neighbors from sunlight, they had withstood the winds and storms of all seasons, and had reached a state of maturity where their wood content was coveted by industry.

When the time came for their disposal, however, the struggles of these trees were forgotten. They went to the block and were sold as they stood for one dollar each. Seventy-five years growing and then to bow their majestic heads for one dollar each, was surely small compensation for a long lifetime of struggle.

And yet, this may not be the only return to those age-old trees. As the rough diamond, after a work of the master cutter has given it its best appearance, may repose at the throat of the society queen, so may the lordly birch, after preparation in the Canadian workshop, reflect back the image of the debutante when used in the construction of her majesty's dressing table—sometimes in the natural state, or when suitably colored, as beautiful mahogany.

Testing Fuels

Furnaces Burning Continuously For One and a Half Years at Ottawa

Two standard domestic hot water furnaces have been in operation, night and day, for over one and a half years at the fuel testing laboratories of the department of mines, determining the relative heating values of the various domestic fuels available in Eastern Canada. This is in accordance with the campaign of the Dominion fuel board on instructions from the Honorable Charles Stewart, minister of mines, in his effort to improve the situation in the domestic fuel markets of the central provinces by encouraging the use of various available substitute fuels.

These furnaces, during tests, are constantly under the supervision of competent engineers and are fitted up to approximate, as closely as possible, actual operating conditions in house heating. In this way not only are the heating qualities of the various fuels accurately compared, but the best operating conditions, such as draft requirements, depth of fuel on grates and frequency of firing are determined for each fuel. The fuels under test include all the domestic fuels available for consumption in Eastern Canada and the tests will indicate the methods that must be employed to obtain the best results.

These experiments are successfully determining the methods and conditions whereby the various fuels available can be most efficiently utilized.

He—May I call upon you. She—Of course not. He—Oh, I didn't mean tonight. I meant some cold, rainy night when I couldn't go anywhere else.

German scientists have discovered a process whereby lobsters may be colored any hue to fit the color scheme of a dinner.

Beef Raising In Canada

Profitable Age and Weight of Cattle For Slaughter

Dealing with the most profitable age and weight of cattle the bulletin on "Beef Raising in Canada," published by the Dominion department of agriculture, remarks that the days of the heavy bullock are past and that the life of the steer is gradually shortening. Still the weighty ox will command a good price for the export trade, provided he is of good beef formation and well fatted. Finish is what is looked for in the market and is as much appreciated in the butchers' bullock of 1,100 pounds as in the exporter weighing 1,500 pounds. Apropos of this, a remark in a recent livestock branch market report is worthy of observation. Packing houses are receiving large numbers of western killers, it says, but are paying but little attention to any other than finished cattle. Most of the finished beeves marketed by up-to-date Ontario feeders are from twenty to thirty months old and weigh from 1,200 to 1,400 pounds.

To Grade Rams In Manitoba

Work Will Be Done By Dominion Live-stock Branch Graders

The annual fall sale of the Manitoba Sheep and Swine Breeders' Association has been set for October 21 and will take place at Brandon Winter Fair Building as usual, announces Secretary J. E. Rettie.

Pure-bred boars and rams will be sold, pure-bred female stock and also grade stock if offered.

An innovation this year is the grading of rams according to the star system in use in Saskatchewan. All rams offered for sale are required to be graded by Dominion livestock branch graders and must be of three or two-star standing.

It is pointed out in connection with the swine section that breeders from the United States are expected to attend the sale in larger numbers than has been usual, thus giving an opportunity to dispose of good breeding stock in greater quantity.

Horse Has Another Rival

Work of Four Done By One Cylinder Motor Plow

The horse, rapidly being displaced in cities and on farms by automobiles and tractors, has a powerful rival in a one-cylinder motor plow, said to do the work of four of the animal toilers at half the cost. The implement, introduced on an English farm, is hauled in and by one man, and owing to its compact construction, can be driven into corners and close to fences generally inaccessible to horse-drawn tools, resulting in increased planting space and a saving of hand work to turn the soil. It requires little attention for upkeep and consumes a small supply of fuel, besides relieving farm hands of the constant care required by draft animals.—Popular Mechanics.

Design For Canadian Flag

James Trevethick, of Vancouver, has designed a flag which he has submitted for the contest being conducted by the Native Sons of Canada, who offer $500 for the best design submitted and who will increase this award to $1,000 in the event of the ensign being accepted as an official flag for Canada. Mr. Trevethick's flag carries the Union Jack in the upper left-hand quarter, but the ground of the flag is of red, bearing nine broad blue stripes, representing each of the nine provinces of the Dominion.

Will Use Douglas Fir

J. S. McKinnon, director of industrial exhibits in the Canadian section of the British Empire Exhibition at Wembley, has informed the Canadian Press that henceforth the British admiralty will use Douglas fir from British Columbia for the decks of all its new warships.

Unique Exhibit At Wembley Shows Quality And Range Of Canada's Forest Products

New Wheat Disease

"Take-All" Disease Has Been Discovered In Different Parts of the West

A fungus disease known as "Take-All of Wheat," has been found in the wheat fields of Northeastern Saskatchewan during a survey by the Dominion laboratory of plant pathology under Dr. W. P. Fraser, Saskatoon.

The disease varied in severity, many fields being free or showing only a trace of the disease, while others showed 10 to 50 per cent. of diseased plants, says Dr. Fraser. It has also been found in wheat fields not far from Edmonton, and has recently been reported from Northern Manitoba. As far as is known at present, the "take-all" disease is confined to the park country, only traces being found in the prairie region.

"The disease is caused by a fungus which attacks only the underground parts of grasses and wheat," says Dr. Fraser. "The young plants may be killed or the injury to the roots or base of the stem cause the plants to be stunted. The disease is most easily noticed at the time the healthy wheat plants begin to ripen. It usually occurs in spots, where the plants are much stunted and of a pale white color, while the healthy plants are green. The heads are small and the kernels are absent or much shriveled. As many of the wheat seedlings have been killed in the early stage, the wheat is thin in the diseased spots. There may be many of these spots in a field. The diseased wheat is easily pulled out, as the roots and base of the stem is decayed. The lower part of the stem, or just below the surface of the ground, is dark or black in color. This dark color is usually best seen by pulling away the sheath. Sometimes small dark spore cases may be seen attached to the sheaths or roots.

"While the disease is serious, there is no need for alarm. From all the evidence obtained, it seems the disease is present on native grasses, and when the land is broken it passes to wheat through the soil. There is no spread from plant to plant in the air, as in the case of rust. Infection takes place only through the soil, so that the spread from field to field, except by soil or stubble transfer, is not probable.

Canadian Foxes For Norway

Prince Edward Island Breedprs Ship 200 Live Foxes

One of the largest shipments of live foxes for export ever to leave Prince Edward Island, left recently for New York for trans-shipment to Norway. The shipment comprised 200 foxes in all with a gross value of $100,000. Several small shipments of animals were consigned to Norway last year and this large order has followed the success which the Norwegian breeders have had with these animals previously sent from this country.

How Many Can Answer This?

To the man on the sublime to the ridiculous, here is a question that will literally set many by the ears. Everett says that one night while dining in England, the British minister of agriculture declared he could not remember whether a cow's ears were in front of or behind her horns. The first six persons—one of them was a milkmaid—whom I asked had no better memory than the agricultural chief. Few people notice anything.—W. L. Phelps in Scribner's.

The Aquitania burns 32,000 barrels of oil a day on her trans-Atlantic voyages.

Canada's pre-eminence as the "soft-woods storehouse of the empire" is forcefully impressed on the mind of visitors to the British Empire exhibition at Wembley, England, by the large and comprehensive exhibit of the forestry branch of the department of the interior.

Canada, with her more than one million square miles of timber lands covered with forests containing about 150 tree species, produces the finest structural timber in the world as well as woods for many other industrial purposes; and this fact has been strikingly brought out in the Wembley display.

Prominent in the exhibit is a wonderful array of 144 panels of 40 different woods, most of which it is demonstrated are obtainable in large quantities. The woods are grouped according to character, each group being separated by various exhibits of structures and articles made of these particular woods. As part of this feature of the exhibit great rolls of Canadian newsprint are shown. Near by is a group of giant timbers which includes two solid blocks of Douglas fir, each twelve feet high and practically five feet square; a segment of Douglas fir eleven feet in diameter, and a timber sixty-four feet long, sixteen inches wide, and eight inches thick.

The history of Canada's forests is also eloquently told on the walls, above the panels and wall cases, in a series of stage settings, showing the growth of the lumber industry throughout the past four centuries, the stages of its development being represented by the explorers, the pioneers, the lumbermen, and the steam-loggers. Four mural paintings tell the story of the journey of the log from the forest to the mill, and two large pictures in wood mosaic depict lumbering scenes in Western Canada.

In the industrial section is exhibited a comprehensive group of articles manufactured from wood, ranging from a complete bungalow of two rooms, and giant silos for the storage of farm fodder, to wooden spoons.

The exhibit has attracted a great deal of attention as shown by the large crowds which have constantly gathered about it and by the many inquiries made of the attendants, and also by the numerous articles and paragraphs that have appeared in the British press, and there is no doubt that in thus making known the quality and range of Canadian forest products to the citizens of the empire, the exhibit will aid materially in the development of this great industry.

Corn Growing In Western Canada

Saskatchewan Grows About 100,000 Acres of Corn Crop

Corn is gradually gaining in popularity throughout the west as an aid to diversified farming and it is estimated that 100,000 acres were grown in Saskatchewan last year although seed was scarce last year and the price rather high, the acreage will probably be slightly higher this year than last. The average acreage of corn grown by the corn growing farmer is about 10. Minnesota Number 13 and North Dakota White Flint are the brands most favored in Saskatchewan.

The increasing favor with which corn is regarded by the farmer is well shown by the increasing sale of corn growing implements. In 1920 the implements sold did not attain the total of 10, while this year approximately 100 corn binders alone were sold, besides cultivating machinery.

A Long Stretch Of Binder Twine

An idea of the extent of Alberta's harvesting operations this year may be gathered from the fact that practically two million miles of binder twine will be required, an increase of 60 per cent. over the quantity used last year. In other words, twine enough will be needed in this province alone to encircle the earth more than 79 times.

114,340,000 In United States

The population of the United States on September 1 was 114,340,000, according to a treasury department estimate. The population on September 1, 1924, had been estimated at 112,-927,000.

Cork Houses

Compressed cork, covered with one and a half inches of concrete, is being used in the building of houses at Ideal, England. It is said to be fireproof and soundproof.

Expenditure of $100,000,000 to bring the Russian telephone system up to date is planned by the Soviet Government.

American Agricultural Editors' Tour Dominions

Prominent members of the American Agricultural Editors' Association photographed at Vancouver on the Canadian Pacific coastal steamer, S.S. Princess Kathleen, during their two days' visit in Vancouver and Victoria in the course of their tour of the Dominion in company with sixty other members of the association.

Left to right: T. L. Wheeler, Indiana Farmers' Guide, Huntingdon, Indian secretary-treasurer of the A.A.E.A.; C. A. Cobb, Southern Ruralist, Atlanta, Georgia, president of the association; John Cunningham, Wisconsin Agriculturist, vice-president; and Charles W. Peterson, The Farm and Ranch Review, Canadian director of the A.A.E.A.

The Calgary Albertan says, "the recent election had one good effect. It destroyed the Montreal intrigue which placed Patmadden in the field, and threatened to be an active force in Canadian politics." We agree with the Albertan so far as it went but it did not go far enough. It should have said there were two good effects and that the other one was the defeat of W. M. Davidson in East Calgary, as it destroyed the hope of the election of men who jump about from pillar to post with the hope of catching stray votes.

We are told that years ago Moses got water out of a rock. It was also Moses put water in our tank this week. How history repeats itself.

* * *

Mrs. Thos. Kinnaird, of Medicine Hat, died suddenly last Saturday. Deceased and Mr. Kinnaird are well known in Redcliff.

* * *

Arrangements have been made to have a band lead the procession to the cemetery next Monday for the decoration ceremony.

* * *

Don't forget the decoration day ceremony under the auspices of the G. W. V. A. next Monday. All the citizens in town should turn out.

* * *

As next Monday will be Thanksgiving Day and a public holiday throughout Canada all the stores in town will be closed. Do your shopping Saturday.

* * *

The monthly general meeting of the G. W. V. A. will be held in the club rooms on Sunday afternoon, next, at 3 o'clock. A full attendance is desired.

* * *

There will be a band practice in the armory on Sunday afternoon at 2:30. All bandsmen are asked to be present to practice for the Memorial Day service.

* * *

Great inconvenience has been caused in town the last few days owing to engine trouble at the pump station. The shortage of water reminds one of the old saying, "You never miss the lager till the keg runs dry." It would appear that the less water there is the more we want.

* * *

Hallowe'en passed off very much as usual last Saturday evening. The usual pranks were played and several parties of youngsters made their annual calls, much to the amusement of those upon whom they called. The Review suffered its annual inconvenience until we got it set up again.

* * *

A turkey shoot will be held in the local armory on Saturday, Nov. 7th, commencing at 7:30 p.m. One turkey up for every six men. Each contestant will be allowed a sighter, which will not count. Open sights will be used. Entrance fee, 50c. Get in the game and win a Thanksgiving turkey.

* * *

The masquerade dance in Cliff hall last Friday evening, under the auspices of St. Mary's Altar Society was well attended and proved one of the jolliest events of the season. Costumes were fairly numerous and varied and added much to the brilliancy of the hall. The prize winners were best ladies' costumes, Margaret Podesta, ladies comic, Marie Fitzhenry; best gents' J. Kirkpatrick; gents' comic, Mrs. H. Chapman. Good prizes were given in all classes.

* * *

Mrs. W. P. Hall received a pleasant surprise last Tuesday evening when a number of her old Redcliff friends called at the home of her parents, Mr. and Mrs. A. Oakland, and gave her a surprise shower when many pretty and useful presents were donated. During the evening games of various kinds were played and a most enjoyable evening spent. Mrs. Hall wishes us to thank all who took part in the shower. Mr. and Mrs. Hall are at present visiting in Redcliff on their honeymoon.

The baby clinic is being held in the school this afternoon.

* * *

All the town school teachers are attending the convention in Medicine Hat today.

* * *

Hunting season appears to be over for this season as ducks and geese have all gone south.

* * *

Thanksgiving Day Dance. Don't forget the big dance in Cliff hall on Monday, November 9th.

* * *

Rumors are again afloat to the effect that the rolling mill is preparing to start operations in the near future.

* * *

Young ladies will be around selling poppies on Monday next. Be sure to get one to wear in the procession.

* * *

There is some talk of a smoker in the G. W. V. A. hall on Armistice evening. This matter will be settled at the next general meeting.

* * *

The Brondway store is putting on a big clearing sale this week. Mr. Warner is assisting with the sale and reports a big business.

* * *

Clifford Bergeron who has been suffering from blood poisoning in his foot for some time, is now gradually improving. He has returned home from the Medicine Hat hospital.

* * *

Young people in town are now making inquiries about the possibility of having a skating rink in town this winter. It should be an easy matter to have at least an open air rink. The council would no doubt give permission for the use of vacant lots and also provide water, light and some material.

* * *

Ranchers from north of here are shipping seven or eight car loads of cattle from this point today. The shippers are Messrs. Ellis, Ross, Newton and Watts. All this stock was purchased by W. Fawcett and are being shipped east. The stock is in good condition.

A memorial known as "The Altar of Peace" has recently been unveiled in Stanley Park, Vancouver, to symbolize the spirit of international good-will existing between the United States and Canada. The memorial was raised by joint subscription of United States and Canadian Kiwanis Clubs, and stands on the spot where the late President Harding delivered the last speech of his life while visiting Canada, in July, 1923.

One of the largest shipments of live foxes for export ever to leave Prince Edward Island, left recently for New York for transshipment to Norway. The shipment comprised 200 foxes in all, with a gross value of $40,000. Several small shipments of animals were consigned to Norway last year and this large order has followed the success which the Norwegian breeders have had with those animals previously sent from this country.

As illustrating the volume of grain delivered by the Port of Montreal compared with that of Vancouver, figures given by the Pacific coast port for the crop year ending July 31 last, show Montreal deliveries were six and three-quarters times those from the British Columbia port. Vancouver shipped 25,133,218 bushels of grain for the crop year ending July 31, while Montreal, during this period, disposed of 169,929,018 bushels.

E. W. Beatty, president and chairman of the Canadian Pacific Railway, accompanied by several of his directors is at present engaged in the annual tour of inspection of the company's system. In an address to the directors of the Canadian National Exhibition in Toronto Mr. Beatty declared that the "only safe and certain cure for the relief of the Dominion's railway obligations rests upon the country's industrial and agricultural development."

Lake Louise From The Air

Here is the first photograph ever taken from the air of Lake Louise, the Rocky Mountain gem that has defied description by artists and poets since its discovery in the early 1880's. In the foreground Chateau Lake Louise, summer resort and centre of mountaineering and trail riding activities. In the background, ten miles distant, Victoria Glacier and Mount Victoria. But what is ten miles distance in such heights?

Airship Not Yet Rival Of Seacraft

Dirigibles Have Not Been Constructed To Stand Strain

The United States will be spurred by the Shenandoah tragedy to new efforts in conquering the air, England's press believed.

London papers agreed that the United States would draw from the catastrophe fresh inspiration to build an airship staunch enough to ride out any storm. But the British themselves read out of the situation the lesson that the airship is not the rival of seacraft, at least not at present nor for a long time to come.

Some papers declared it was hardly worth while for the present generation to consider designing an airship capable of carrying heavy or bulky sea cargoes.

Dirigible experts pointed out that airship construction still is, to a large extent, guesswork, at least insofar as determination of actual strain and stress on the complex framework is concerned. Only experience in building such craft gives an idea of the stress to which the ship will be submitted but it cannot be worked out with mathematical nicety as, for instance, in the case of bridge span building. The experts hope the new disaster will spur air technicians to master this phase.

They drew the lesson that accurate weather and meteorological information must be supplied to dirigibles if they are to skirt storms such as brought the Shenandoah down. They held that if Commander Lansdowne had had proper warning his craft could have ploughed past the storm instead of being caught in the midst of it.

To Protect Fur-Bearing Animals

May Be Close Season For Beaver In Manitoba

S. V. Jackson, professor of botany and biology, Manitoba University, has been travelling in Northern Manitoba obtaining information for the Provincial Government in connection with the survey of natural resources. Prof. Jackson is especially interested in the game branch of the work with a view to the conservation of fur-bearing animals.

Prof. Jackson stated that north of the 53rd parallel, which had formerly produced 95 per cent. of the total number of muskrats for the province, production is now reduced to 45 per cent. over this period. Beaver has been reduced in even greater percentages. To poison and trapping out of season is chiefly attributed the heavy reduction. As a solution for the difficulty Professor Jackson thought that the government would possibly consider putting a close season on beaver for five years and also restrict the issuance of trappers' licenses in the six fur-producing sections of the province, to one-year residents only. Trapping of muskrats is now prohibited during the fall of each year.

Held Record For Meanness

Great Uncle of Viscount Lascelles Knew How to Save Money

That fine, old Yorkshireman, the Earl of Harewood, is now 79. Lord Harewood, of course, is the father of Viscount Lascelles, Princess Mary's husband. Lord Harewood had a notorious uncle in the Marquis of Clanricarde, who left his millions to Viscount Lascelles. The marquis was so mean that even when the newspapers were filled with news of the great war he preferred to save his penny in a public library. He voluntarily endured semi-starvation at a time when his income was about £100,000 a year. One of his clubs declined to permit him to buy his meat raw and bring it to the club to be cooked.

Titled Farmers

The life of a Canadian farmer makes appeal to Lord Edward Montagu, the 19-year-old son of the Duke of Manchester, and he has come to Lord Rodney's ranch in Saskatchewan. He found there the Duc de Nemours, nephew of the King of the Belgians, who went out some time ago as a pupil, accompanied by a nephew of the Earl of Derby.

Strange Places For Letter Boxes

There are many letter boxes in strange places in London. One is to be found under the doorstep of a house. In one locality, the postman, when he has a letter for the top floor of a building, gives a shout, when a box is let down on a string from the top window and the letter hauled up.

Good Market For Umbrellas

Umbrellas have grown to be an important item in the export business to East Africa, where they are used by natives for protection against the sun and rains. More than half the umbrellas imported come from Great Britain.

Thrilling Feat Recalled

Blondin Carried Man Over Niagara Rivers on Tight Rope 65 Years Ago

At the request of a reader, who had been prompted by the attempt of Bobby Leach to swim the Niagara River below the Falls, inquiry when Blondin crossed them on a tight rope, and if it were true that he carried a man over on his back, the St. Catharines Standard dug up the story of the daredevil feat. The man Blondin carried on his back sixty-five years ago was Harry McColcord, who for some years was Blondin's manager and assistant in circus work in several countries. McColcord got $1,000 for his share in the performance.

The rope, although drawn as tight as possible by a windlass worked by 16 horses on the American side, sagged 50 feet in the middle, where it was only 27 feet above the water. For 60 feet of its length, too, it swayed in the wind and the draught from the falls with a play from side to side of 50 feet.

When he was fairly over the water Blondin had to pause for a rest. McColcord alighted and stood on the rope with his hands on Blondin's shoulders. He then climbed on his shoulders and the trip was started again, McColcord's description was:

"The rope was comparatively steady until we reached the centre, where there were no guy lines. We had made about ten feet on this when Blondin tottered in an effort to walk straight, the balance pole going furiously up and down. He had lost his balance. In that awful moment his advice most forcibly impressed itself upon me, and I strictly followed it, resting passively and nimbly upon his shoulders, to stay or fall with him as might happen. Discipline rose superior to instinct. Unable to regain his balance, he ran along the rope, the impetus keeping us up, his pole thrashing madly up and down for 50 feet, when we reached the first guy line, and it stopped, but with wonderful agility he ran for the next, and on reaching it, gave me the order, 'Get down, quick!'

"Again I mounted his back and in a few minutes we alked up the incline of the rope to the land. It seemed like a lifetime, but it was just 46 minutes."

Truly, there are enough thrills in reading the story without watching another feat like it!

Took Coffee Beans To India

Mohammedan Saint Carried Small Supply from Arabia

In these days, says a Bombay paper, when coffee is bringing the highest price on record, the planters are not ungrateful to the Mahommedan saint who is said to be responsible for taking the coffee beans to India.

Legend says that Baba Budan, a Musselman from South India, made the sacred pilgrimage to Mecca, and while there obtained possession of a small supply of coffee beans which he decided to bring back with him.

In spite of many difficulties on the road he held fast to his seeds, though he does not appear to have been fully acquainted with the properties of them. He decided to make his home on the hills in the Kadur district of Mysore state, hills which are now known by his name. Here he proposed to live as a Musselman fakir or saint.

One of his first acts was to plant the coffee seeds he had brought with him. He selected a suitable place near Attigunda, and by and by the plants grew until they yielded a few beans. It is said that Baba Budan was himself surprised at the soporific effect of the beans, though he must have heard something about the use to which the beans were put in Arabia. The beverage made proved most popular, and gradually a considerable garden was opened.

Power Shovel Breaks Record

Loaded 3,750 Cubic Yards of Rock on Cars in Eight Hours

All known records for moving material with a power shovel were recently broken when an electric giant in a southern mine loaded 3,750 cubic yards of rock on to cars in one eight-hour shift.

To accomplish this task the eighty-foot steel boom with its eight-cubic-yard dipper had to reach down, fill itself, rise, swing around and empty into a car at the rate of once every minute and a half throughout the period. The rock moved by this single electric Titan would make a six-inch pavement up a sixteen-foot road a quarter of a mile long, and to load the same amount of rock by hand in eight hours would require an army of 1,500 shovel men.

The electric shovel was operated by two men.—Utility Bulletin.

Some men are truthful at all times except when their wives ask for money.

Wireless In Swiss Alps

Has Replaced Dogs As Rescuer Of Lost Travellers

Among the latest developments in wireless is its introduction into the Alps as a means of summoning rescue parties to render assistance to tourists. This information comes from Geneva, and the dispatch adds that the innovation, it is believed, will save many lives. That beneficent purpose has already been achieved on sea, and it is only natural that wireless should also be utilized in the mountain wastes of ice and snow or in the desert sands of North Africa. The saving of life is a paramount consideration, but wireless in the Alps may rob them of one of the elements of romance enshrined in their recesses. The mind reverts to juvenile days and to the stories that came out of Switzerland telling of the Hospice on the Great St. Bernard in the Valais pass between that country and Italy. They told of the noble breed of dogs, reared in the monastery and trained by the monks to search for and relieve lost travellers. A touch of fancy could even hear the tinkle of the bell hung from the dog's collar to attract attention to his mission of mercy.

Not so much is heard of these dogs in modern times. Possibly they may no longer be needed, at least so frequently as they were at a time when the Alps had not become the favorite resort they are today. If any be left in the service for which they were originally bred, the introduction of wireless may mean the end of a gripping chapter of Alpine history. The St. Bernard himself may survive as an ornament of the show bench, but without that look in his brown eyes that revealed his mission.

Distance does lend enchantment to the view, and wireless has killed distance as it has done away with a good deal of oldtime romance.

Challenges Welshman For Championship

English Town Crier Is Confident He Holds Title

Old-time "town criers" have not all disappeared from England. That is proved by the fact that one of them, William Anglias, has challenged another, William Powell, to prove himself entitled to the proud title he holds of "Champion Town Crier of England."

Anglias is crier at the town of Marlborough. Powell is crier at the Welsh community of Pembrokeber. The comment made here is that Powell could easily beat Anglias by simply mailing the latter cry: "Pembrokeber."

Should Be Thorough

At present it seems to be taken for granted that if a man is able to purchase a car he is also able to drive it, but the two do not necessarily go together at all, and the permit and test system should be thorough enough and have rigor enough to stop a man from driving the car he owns if he is not a competent driver.—London Advertiser.

A Queer Coincidence

The names of John Alden and Miles Standish were called in federal court, Boston, Mass., when lists of jurors drawn for service in the current session were read. Both were present.

John Alden, of Newton, an engineer, was enrolled as a petit juror, while Miles Standish, of Wrentham, an engraver, was assigned to the federal grand jury.

Germany's Potash Industry

Business Has Shown Remarkable Increase Over Pre-War Record

Potash concerns are among the very few German industries that have not suffered materially as a result of the post-war financial and industrial crisis. They not only have not suffered, but have succeeded in almost tripling their business.

During the first six months of the year 1925 the amount of potash sold by the German industries amounted to 730,000 tons, which is almost three times the amount disposed of during the same period of the preceding year and also represents a vast increase over the total of 520,000 tons of the pre-war record of 1913. Every ounce of the stock left over from last winter has been sold, and all the concerns today are working at full blast.

This showing of the German potash business is regarded as quite remarkable in view of the fact that Germany's world monopoly of the industry suddenly was broken by the loss of the Alsatian mines in France, followed by the discovery of promising potash deposits in Texas, Spain, Galicia, the Balkans, Mexico and elsewhere.

Women In Athletic Field

Canadian Girls Are Invited to Compete in Belgium

There is something significant in the complimentary luncheon tendered recently in Toronto to the members of the Canadian women's track and field team which competed in England this summer. Not much attention has been paid by the union to women's athletics until this year, when the invitation arrived from the British Women's Athletic Association to send a team to London to compete. The proposal to form a Canadian Women's Athletic Union has been given impetus by the fine impression created by the Canadian team in England. Officers of the English organization have offered their services in connection with the establishment of a national organization for women athletes in Canada, and a Canadian team has been invited to compete in Belgium next summer.

Guardsman Very Much Alive

French Girl Convinced When He Winked At Her

London is full of tourists from practically all countries, and most of the overseas visitors never fail to be interested in the stalwart guardsmen on duty at the Horse Guards headquarters in Whitehall.

Some stare at them deliberately, and one French girl refused to believe one motionless figure was alive. She stood alone and gazed harder, then suddenly joined her English friends looking somewhat flushed. She explained that the soldier was real after all—he had deliberately winked at her.

New Device Protects Hat

Device by which a felt or straw hat cannot blow off by the wind is said to have been invented. It consists of a small moulded button fastened to the hat through a buttonhole in the front of the sweatband. When the hat is placed on the head, the button sticks to the forehead on the vacuum principle. The grip is out of sight when worn, and it said to be comfortable.

A Hawaiian worked 18 months in making a feather cape.

Famous Englishmens' Graves Are Neglected

Covered With Weeds, Few Know Of Their Existence

All over England there are forgotten graves of great Englishmen. Tombstones have slipped; earth has been washed away and monuments are awry; weeds overgrow the lettering and, forgotten and neglected, some of the greatest men in history sleep their last sleep in obscurity.

One can visit any cemetery in and about London and be shocked and surprised at the condition of the graves. No one seems to care. Sometimes there is an endowment for perpetuity; otherwise there are just weeds and moss and forgetfulness.

Mr. Algernon Ashton, who has rendered more service to the memories of the great men of former days than any other of his time, says, "Kensal Green is one of the most interesting cemeteries in London. Close by the tombs of the Dukes of Cambridge and Sussex is the last resting place of Blondin. Thackeray lies near Leech and Dicky Doyle, Francis Thompson, Anthony Trollope, Adelaide Ann Procter, Mrs. Craigie, Leigh Hunt are but a few of the well-known names on graves now nearly forgotten."

Rarely are these tombs visited; few know of their existence; but Kensal Green is not alone in its obscurity. In Chiswick Parish Church, for instance, are buried Whistler and Hogarth, and in Richmond Churchyard lie the remains of Kean.

Almost everywhere heroes lie forgotten. In 1792, Captain George Vancouver, son of Captain Cook's assistants, discovered Vancouver Island. In 1795 this intrepid navigator died at Petersham, and was buried in the village churchyard.

A reporter had the greatest difficulty in finding the grave, although an imposing tablet in the church commemorates Vancouver's exploits. So overgrown and defaced is the grave that a party of loyal Vancouver pilgrims photographed the wrong tombstone the other day.

Industry Key To Success

Places Worth Reaching Have To Be Won By Work

Fred W. Sargent, new president of the Chicago and Northwestern Railway, gives as the key to success the one word—industry.

That's comforting, especially for the young man or woman who is starting at the bottom with some big concern and wonders if real, hard work can ever be noticed in a world that seems to place so much reliance on "front."

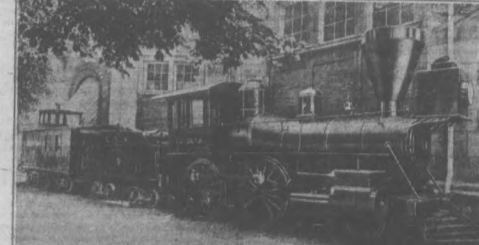
Just industry. Not talk, or office politics, or ability to play a good game of golf with your superiors—just industry.

The men who get to those places that are worth getting to almost without exception are the ones whose hard work took them there. It's the only way.—Vancouver Sun.

Dope Lifting Embargo On Apples

Requests for the lifting of an embargo on Canadian apples which had been enforced for the last five years, have been filed with the Japanese Government, according to consulate officials at Vancouver. Samples of the new crop are to be shipped to Japan as soon as possible, and if they are pronounced free from larvae of the codding moth, the embargo will be lifted, it is expected.

The annual profit of the Suez Canal is now $15,000,000.



LUCY DALTON ON VIEW AT THE TORONTO EXHIBITION

They were going to put her on the midway but she felt that that was hardly the place for a lady of her charms and distinction, and so she was allotted a position outside the Canadian Pacific space in the Railway Building.

Who is Lucy Dalton

Lucy Dalton was the first of the feminine gender to roll into North Bay puffing smoke. A regular speed artist she was, and she rolled her own. Apart from all this she is a wood-burning locomotive built in Taunton, Mass., by William Mason in 1871, and she came off the old St. Lawrence and Ottawa Railway (now the Prescott branch of the Canadian Pacific) upon the construction of the C.P.R. in consummation of Confederation in 1867.

She was called the Lucy Dalton in honor of the sister-in-law of Lord Lisgar, who was then governor-general. She was afterwards assigned the road number "92." When North Bay became a town the other day Lucy Ford chassis under her before she could go very far. Determined to "see this world before the next" she

American Farmers Flocking to Canada

Land At Bargain Prices and Big Wheat Yield Proves Lure

American tenant farmers are flocking to Western Canada, where plenty of good farms are being picked up at bargain prices. So long as farming was highly remunerative in the United States those tenants were willing to work and pay their rent, but now things are somewhat slow from an agricultural standpoint in the republic and the tenants have developed ambitions to become land owners in the Canadian west.

J. Bruce Walker, who is in charge of immigration from the American West, says that this year the exodus to Canada is 50 per cent. greater than a year ago. The Canadian authorities have been promoting cheap excursions from various states into Canada to allow low cheaply farms can be bought in Manitoba, Saskatchewan, Alberta and British Columbia, and once the Yankees see the lands, they want to buy them.

The huge Canadian wheat crop is also attracting many visitors, it being recognized that every year, no matter what the conditions of farming generally, the wheat is as good as the gold.

Indians Of Guatemala Very Superstitious

Many Mysterious Rites Are Part Of Everyday Life

The Indian of Guatemala is born, lives and dies in the midst of superstition. His crop is planted, cultivated and harvested with many mysterious rites. When the Indian from the upland visits "la tierra caliente," he places a carefully marked stone in a certain position known only to him. If the stone is undisturbed upon his return it indicates that his wife has been wholly faithful during his absence.

The moon plays an important part in the living of these people—planting, harvesting, nearly all farming operations are influenced by various phases of the moon. No Indian would think of sleeping where the moonlight could shine in his face—"it makes one foolish," he will tell you.

One frequently sees the Indian or Ladino in the street or on the trail with a large black patch on the temple. This is a piece of dark colored leaf, and it is pasted on the forehead to cure or prevent headache. It is a common sight to see the favorite dog of the family adorned with a necklace of dried lemons, designed to protect him from such ills as beset dogkind.

Interesting Discovery In England

Workmen Have Unearthed Portion of Great Roman Wall

A very interesting discovery is reported from a place called Wighton in Cumberland, England, where workmen, while cutting a pipe track in connection with a water scheme, came across obstructive masonry about three feet below the ground level, and further investigation led to the conclusion that the masonry is a portion of the foundation of the western section of the great Roman Wall of Hadrian, which extended some seventy English miles from the Solway Firth to the Tyne. The structure is about five feet deep and eight or nine feet wide, and built after the Roman manner—out of solid masonry, but with facing on each side of large wrought freestone, the space between being filled in with stones and rubble. Although the Roman wall dates back to the second century the workmen had considerable difficulty in cutting through the mass.

Irish Immigrants Coming

Prospects for the emigration of many Irish people anxious to settle on ranches in Canada are apparent at the present time, in the opinion of Arthur Mullan, Belfast, Ireland, who has been purchasing dairy farms in Manitoba. Mr. Mullan plans to return to Canada at an early date and will be accompanied by a large group of Irish immigrants.

Royal Fair Entries

The management of the Royal Winter Fair to be held in Toronto, Nov. 13 to 21, recently announced that all the provinces of the Dominion would be represented in the livestock exhibits in the coming event. It was also intimated that the British Columbia Government will forward an exhibit of fruit as well as one of livestock.

Shingle Roof Lasts 37 Years

Thirty-seven years was the life of a shingle roof that T. C. Van Eaton, a pioneer after whom the city of Eatonville, Wash., was named, renewed this summer. The structure houses a department store, whose proprietor declared that not a cent's worth of goods had been damaged by leakage. The shingles were split out of red cedar cut near Eatonville.

WORLD HAPPENINGS BRIEFLY TOLD

The United States had a fire loss in 1924 of $550,000,000, it was reported to the Fire Marshals' Association at San Antonio, Tex.

The entire contents of the residence of the late Viscount Leverhulme at Hampstead, England, have been sold to the Anderson Gallery of New York City, for disposal there early in 1926.

More than one million of New York's juvenile population answered the call of the school bell for the fall term. They are accommodated in 700 buildings with 20,000 teachers.

Furs valued at $150,000, part of a $200,000 haul made by robbers July 13, from a fur warehouse in New York, were found by the police in a vacant road house on Long Island.

Three workmen have been held for trial in connection with the destruction of the Diet Building at Tokio on September 8. It may develop that the fire was of incendiary origin.

The Delaware River Bridge, under construction at Camden, N.J., has a hoodoo. The death of a laborer by a fall from the structure recently brought the list of fatalities on the big span to 12 since May of this year.

Bakers in convention at Buffalo, N.Y., were told that 36,573 bakeries in the United States, with $417,000,000 invested and employing 127,495 persons, supply bread for sixty per cent. of the nation's homes.

A London dispatch says that arrangements for re-introducing penny postage into South Africa on January 1 are proceeding satisfactorily, and the concession will come into force on that date.

Just as the rope was being adjusted about the neck of a communist conspirator at Sofia, Bulgaria, a reprieve from King Boris arrived. The King is known for his antipathy toward capital punishment.

A typhoon, described by officers aboard the United States destroyers Ford and Pillsbury as the worst in their experience, swept three sailors overboard off Tsingtao, China. Two were drowned.

The oldest inhabitant of Bristol, England, Mrs. Mary Jarrett, has died in her 105th year. She outlived all her children, and her descendants number over 100. When the King and Queen visited Bristol in June they congratulated the old lady on her age.

Parcel post to the Yukon will be suspended during the close of navigation on the Yukon River, which extends from approximately October 1st to May 31st, according to a bulletin issued by the post office department at Ottawa.

Two large suspension bridges are to be erected across the Fraser River Canyon near Spuzzum, B.C. These are links in the inter-provincial highway and are on the old Cariboo Trail. Tenders are to be called shortly for construction of bridge towers and piers.

Discovers Cure For Dread Disease

Ontario Veterinary Surgeon Believes He Has Found Cure For Cancer

Dr. T. W. Galbraith, veterinary surgeon of London, Ont., believes, after five years of experimentation, he has discovered a cure for cancer. So positive was Dr. Galbraith that his cure, called "lasin" was the real thing, that he injected cancer virus into himself last fall and then proceeded to cure it with "lasin."

"This lubstance," says Dr. Galbraith, "administered where canber has developed, has broken it down. It is practically a preventative and brings immunity. We have experimented with dogs, horses and goats and we find that we have at last reached our goal—a cure for cancer."

American Farmers Purchase Land

Acquire Thirty-three farms and Will Move to Saskatchewan

Optimistic over the future of Western Canada, its magnificent crops and fertile soil, 30 farmers from the United States are enroute to their homes after purchasing 33 farms in the Snipe Lake and Eston districts of Saskatchewan. They hope to move their families to Canada this fall or early next spring.

The prospective Canadian settlers expressed themselves as highly satisfied with conditions generally in the west, and predicted an influx as a result of their favorable observations.

Speed in the Air

It is very evident that those who desire real speed must take to the air. A mere 90 or 90 miles an hour in an automobile is pretty tame compared with the record of the French flier who made better than 150 miles an hour for four hours.

Big Exhibition Helps Trade

Canadian Companies Receive Large Orders Through Publicity At Wembley

The second year of the British Empire Exhibition has proven of greater benefit to Canadian trade than 1924. It has been directly responsible, for instance, for the disposal of 125,000 cases of the 1923 pack of salmon and materially helping in disposing the 1924 and 1925 packs; large orders were placed for Canadian furniture; one Canadian rubber company has opened a branch in London and another reports an order of 35,000 pairs of rubber boots; one Canadian firm sold $100,000 worth of made-up furs. One of the governments represented at Wembley has negotiated for the purchase of 75,000 Canadian plows. The most significant feature of the exhibition, however, is that 130 Canadian firms not previously represented in London have appointed permanent representatives and are prepared to do export business.

Surgeon Performs Delicate Operation

Two Stitches In Heart Saves Life Of A Little Boy

Two stitches in his heart, which had been punctured by a pair of scissors in a fall, saved the life of Melvin Jones, five-year-old boy.

Dr. Herbert H. Schoefeldt, of the Children's Hospital at Washington, D.C., performed the delicate operation, pulling back three ribs to make an opening and lifting the heart up with forceps. A gash a quarter of an inch long was disclosed. Two stitches were taken and the heart placed back in position.

The boy was playing with his brother and sister and started upstairs to cut paper dolls with a pair of scissors in his hand. Tripping, the scissors pierced his side.

Blood was taken from the arm of his father and transfused into the boy's body.

The Wheat Pool

Anything That Benefits the Farmer Helps the Country at Large

Upholding people who have faith to the belief that the mass marketing of the farm crop is redolent of the combine idea. It is far from that. Farm business has hitherto had too much of the hit-and-miss complexion. Every farmer seemed to be running his own show in a rather unintelligent manner. The result was that the industry was down at the heel. The public has gotten a belated lesson that when farming loses out all other business is flat. —What is needed in Canada is a living wage for the agricultural class. The wheat pool tends in that direction. When the farmers begin to get too much money is time enough to think about a combine. If the farmers get nicely upon their feet we shall all feel better. - Good luck to the wheat pool.—Galt Reporter.

Heavy Cost Of Elections

General Elections to Cost Country Some $2,000,000

The Dominion general election which is in progress now will cost the country two million dollars. Appropriation of the necessary outlay is a statutory provision of the Dominion Elections Act.

The carrying out of the act is under the direction of the chief electoral officer while the executive administration of the financial outlay is under the auditor-general. There are about 245 returning officers. Their pay is dependent upon the extent of the constituency, the number of polls, etc. Other large items of cost are printing, stationary and expenses connected with the registration of voters.

Government Buildings Burned

Several Injured In Million Dollar Fire At Tokio

Fire has destroyed the Diet Buildings, two storey wooden structures, which housed the legislative branches of the Japanese Government.

Several persons were injured in the fire, is estimated at $1,000,000. Many valuable documents were lost when a government library in one building was burned. A big modern building is under construction to supplant the buildings burned, but it will not be ready for several years, it is understood a temporary structure will replace the ones destroyed.

The Diet was destroyed once before by fire. It was rebuilt 34 years ago.

An All-Metal Seaplane

A new seaplane of unusual design has been built at Glasgow for the air ministry. The craft is made entirely of metal, even to the floats, so that it is able to ride out quite rough seas without any fear of damage. It has been given the official designation of Invernese, and is intended for carrying out long distance reconnaissance flights for the fleet.

ECLIPSE FASHIONS

Exclusive Patterns

Charming Design For An Overblouse

Paris puts a frill on its smartest overblouses, and so we have it here as the distinguishing touch on the two modes pictured above. White crepe-de-chine develops this blouse, the front of which is gathered to the back slightly below the shoulder-line in yoke effect. Right up to the minute is the convertible collar with its trimming-band of the new pansy purple shade. The same trimming is used for the pocket-tabs, and the narrow cuffs on the long sleeves. Printed silk in a small design fashions the blouse with the short sleeves, with material of a lighter tone used for trimmings. Sizes 34, 36, 38, 40 and 42 inches bust. Size 38 bust requires 2½ yards of 36-inch material. Price 20 cents.

Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically, by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make it out without difficulty an attractive dress. Price of the book 10 cents the copy.

Received Message From King and Queen

Aunt of Earl Jellicoe Recently Celebrated Her 104th Birthday

Earl Jellicoe's aunt—Miss Catherine Jane Jellicoe—celebrated her one hundred and fourth birthday at her home in Southampton, England. She received congratulatory messages from all parts of the British empire, a telegram from the King and Queen of England being among the first to arrive. The British naval hero visited his aunt, who continues to live an active life. She breakfasted in bed as usual and spent the morning reading a mass of messages. Later two little girls from a neighboring orphanage, of which Miss Jellicoe is a generous benefactor, brought her flowers, and with them Miss Jellicoe discussed her own girlhood with great zest.

Fewer Labor Troubles

Time Loss in Industrial Disputes Less in August

The time loss caused by industrial disputes was less in August than in the previous month, or in August last year, says the federal department of labor Gazette. Seventeen disputes were in progress at some time during the month, involving 12,003 employees and resulting in a time loss of 162,316 working days. Corresponding figures for July were as follows: 16 disputes involving 12,853 work people and 220,423 working days; and for August, 1924, sixteen disputes, 9,477 employees and 206,118 working days.

B.C. Wealthy Apples

Shipments of British Columbia Wealthy apples made to South Africa last season arrived in good order, according to reports received at Vancouver, and the deal was so satisfactory that repeat orders have been received for 1925 delivery.

Chinese wag their clenched fists instead of shaking hands.

Flying and Sailing Ship

Remarkable Plane Has Been Completed For British Government

An aeroplane which is both a flying and sailing ship has just been completed for the British Government and will soon be handed over to the Royal Air Force for trials.

Special masts and sails of light material, over 1,000 square feet in all, will enable the aeroplane to be quickly converted into a true sailing ship, should its 250 horsepower Napier engines fail to work and force descents on the water.

The plane is expected to reduce materially the dangers of long flights over large bodies of water, and if it proves successful it should encourage attempts to fly to the United States.

Experts describe the flying boat as "very remarkable." It was designed by Dr. Rohrbach, a German engineer. Neither wood, wire nor fabric has been used, and the original idea was to develop planes for open sea reconnaissance work with the fleet.

The plane is a four-seater and its whole structure is protected by a special process against the corrosive action of the sea. Another advantage derived from the all-duralumin construction is the fact that the mechanics can walk to all parts of the plane without fear of damaging it, and even while it is resting on the water the mechanics can stand on the water to make repairs. Likewise the engines can be reached when the craft is in flight.

If the testg prove satisfactory the plane, it is said, will be used as the "eyes" of the British navy.

Agricultural Exports Increase

Exports of Products of the Farm Nearly Doubled in August

In a summary of the part of Canadian trade issued by the department of customs and excise, it is shown that Canadian trade in August, 1925, increased nearly $60,000,000 compared with August, 1924. The total exports and imports last month was valued at $194,288,288 as against $136,791,203 a year ago, an increase in August, 1925, of $57,597,085.

The value of imported goods in August 1925, was $81,974,474, in August, 1924, imports were $61,969,577. Exports last month were $111,409,535 compared with $73,821,631 in August, 1924.

The increase in imports was general, the marked increase being that of about five million dollars in iron and products of iron. Exports of agricultural and vegetable products were nearly doubled, jumping from $19,924,522 in August, 1924, to $38,238,341 in August, 1925. There was a general increase in all the classified groups in exports as in imports.

In the five months ending August 31 last, imports totalled $374,057,656, and exports $462,817,429. The figures for the same period in the previous fiscal year are: imports, $293,228,163; exports, $401,131,225.

Invented Rapid Fire Gun

Frank Milton Garland Dies at Home in Bay Haven, Conn.

Frank Milton Garland, inventor of the Garland rapid fire gun, 71, one of the first and simplest automatics of that type, died at his home, New Haven, Conn. He had been ill since he suffered a shock while in Europe on a secret mission on which President Wilson had dispatched him.

Mr. Garland was born in Hennaker, N. H. When he was seventeen years old he entered the employment of the Winchester Arms Company in this city. While there he read of Maxim's experiments with a gun operated by the recoil and began working along the same line. His first gun, of the Gatling type, was successful.

At the close of the Chino-Japanese war, Mr. Garland went to China, with other professional men at the invitation of Li Hung Chang, to survey the country's resources.

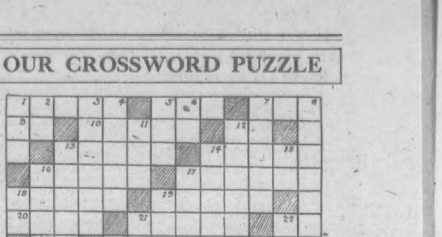
B.C. Town Buys Graded Eggs

Realizing that the marketing of eggs has arrived at the stage where the grading of eggs at the local store no longer meets the economic requirements of the industry, merchants of the town of Chilliwack, B.C., have decided to refuse to accept eggs in trade and instead eggs are being sent to one dealer who is in the poultry and egg business. This dealer is accepting eggs for cash and pays on a graded basis. He and a feed merchant buy all the eggs in the district which are not shipped direct to Vancouver, and both men maintain that the purchasing of eggs in this manner is much fairer to both the farmers and dealers.

In Belgium nearly all motorists carry emergency kits to be able to assist any injured person found along the way.

In 1920 Russia purchased more than $5,000,000 worth of ammunition from the United States.

OUR CROSSWORD PUZZLE



Horizontal

1—Boundary of posts and wire.
5—Speck.
7—Hindrance.
9—Chopping tool.
10—Enthusiastic to excess.
12—Behold.
13—Watery portion of certain animal fluids.
14—Growth of hair on the face.
16—Vegetables.
17—Turned.
18—Needs.
19—Store away greedily.
20—Higher branches of learning.
21—Ones who succeed others in the possession of property.
22—Objective case of I.
23—Ridge of glacial sand.
24—Aquatic mammals.
25—Toward.
26—Incense.
27—Gaze at fixedly.
28—Foot covering.
30—Pastime.
31—Laborers.
32—Narrows to a point.
34—Braid of hair.
35—Make amends for.
36—Stomach of a ruminant prepared as food.
38—Pronoun.
39—Find fault with.
40—Article.
41—Nothing.
42—Sheltered side.
43—Roman magistrate.

Vertical

1—Popular craze.
2—Prefix meaning out of.
3—Makes a sharp, harsh sound.
4—Merits.
5—Mists.
6—Alleged mesmeric force.
7—Council or court.
8—Conundrum.
11—Public conveyance.
12—Sly, side-long looks.
13—Religious denominations.
14—Engures.
15—Prefix meaning again
16—Noblemen.
17—Thin dress material.
18—Sixth note of diatonic scale.
19—Central part.
21—Listens to.
22—Celestial bodies.
24—Shop.
25—Plural of "that."
26—Get.
27—Consumed.
28—Oozed.
29—Plural ending of many nouns.
30—Ruin.
31—Lofty self-respect.
32—Near.
34—Prefix meaning three
36—Definite article.
37—Single unit.
38—Engineering degree.
40—Aluminum (abbr.).

Wasting Helium

Canada is the Sole Source of Helium in the British Empire

When the Shenandoah was destroyed, helium gas valued at $150,000 was lost. Helium is the best gas for inflating dirigibles, for, though it has only half the lifting power of hydrogen, it is safe; it will not burn, while hydrogen is highly inflammable. The loss is serious, in a way, because helium is a comparatively rare element, and the United States did not have enough of it on hand to inflate its two dirigibles, the Shenandoah and the Los Angeles, at the same time.

The experience of the United States recalls the fact that Canada, the sole source of helium in the British Empire, is wasting enough of this valuable gas every year to inflate a fleet of Shenandoahs. Helium is found in the natural gases of Ontario and Alberta. It adds nothing to the value of these gases for heating or illuminating purposes and can be extracted with no great trouble. Nothing, however, is done about it. How Ireland gas is three-tenths of one per cent. helium. Calgary uses an average of 4,000,000,000 cubic feet of Bow Island gas each year, so that in that city alone the annual waste is 12,000,000 cubic feet of helium, or about six times the amount required to lift the Shenandoah.—Vancouver Province.

Demonstrates Latest Radio Device

Egg Cooked By Wireless Over Cake Of Ice

Cooking an egg over a cake of ice by wireless was one of several demonstrations of mysterious radio power given at the World's Radio Fair.

The egg was placed in a frying pan on the ice.

In a moment the pan became red hot through the action of the waves that penetrated the ice.

The egg soon was cooked to a turn.

The trick was done through the so-called wireless lamp, the inventor of which also lit the bulb through a man's head.

It is said in local radio circles that this operation can be performed by means of high frequency current. This is declared to be nothing new in the radio world, but has not before been known to the general public.

The Editorial Senators

The appointments of Mr. J. Lois, Toronto, and Mr. W. A. Buchanan, Lethbridge, Alta., to the senate are well merited honors, to two eminent journalists. They will be a strength to the Upper Chamber and will ably support the reforms that are so much needed to make that body serviceable and powerful in Canada's interests. In journalistic circles their selection will be approved and commended.—Kingston Whig.

True friendship between women is a matter of doubt to most men.

Production Of Fisheries

Salmon Pack In 1924 the Largest In History

The total value of the fisheries production of Canada for the year 1924 was $44,534,235, compared with $42,565,545 for 1923 and $41,800,210 for 1922. These totals represent the value of the product as marketed, whether fresh, domestically prepared or factory made. The four chief commercial fishes in order of value were, salmon with a total market value of $13,784,920; halibut, $5,578,570; cod, $5,443,814; and lobsters, $4,169,171. The pack of salmon in 1924 was the largest in the history of the industry, amounting to 1,749,968 standard cases of 48 pounds each, compared with 1,616,157 cases in 1918, the previous record year. Of the principal kinds of fish (those having a production value at $1,000,000 and over), salmon, cod, herring, mackerel, sardines, smelts, whitefish and pickerel, showed increases in marketed value compared with the preceding year, while halibut, lobsters and haddock showed decreases.

Scientists Interested In Faker

Egyptian Demonstrates Power to Make Himself Immune From Pain

Immunity from pain is claimed by an Egyptian fakir, who is interesting scientists in Paris. He claims that he can exercise absolute control over his nervous system by will power. Thara Bey went into a self-imposed catalepsie fit. Two assistants then placed a large stone on his abdomen, calmly proceeded to drive needles and short swords into his flesh and placed his body on a board clustered with sharp-pointed nails. They finally buried him for twenty minutes in a coffin filled with sand. The Egyptian emerged from all these ordeals without the slightest trace of injury.

Strange Things Found In Handbag

A motorist at Hoghton, near Preston, found a woman's handbag on the main Bolton road. He pulled up, searched the bag for an address, and found that it contained: Seven lace handkerchiefs, three Japanese fags, eighteen cigarettes, three Pelix cats, one powder puff, false teeth, Mascot dog, a French penny, a live frog.

Henry VII. was King of England when Columbus discovered America.

BABY USED TO CRY ALL NIGHT

Pimples on Face and Limbs. Cuticura Heals.

"Pimples broke out on the side of my baby girl's face and later on her limbs. They lched something terrible and she used to scratch them causing the trouble to spread, and also irritated it. Her clothing aggravated the breaking out on her limbs and she used to cry about all night.

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. I purchased more, and after using one and a half boxes of Ointment and one cake of Soap she was healed." (Signed) Mrs. Bennie Shelburn, 4039 W. 110th St., West Park, Ohio, Aug. 22, 1924.

Use Cuticura for all toilet purposes.

Sample Each Free by Mail. Address: Cuticura Dept. "Reviews," Ltd., Montreal. Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

Canadian Archer Wins In England

Belleville, Ont., Man Makes Good Showing in Sport Almost Unknown Here

Archery is a sport almost unknown in Canada, although it is practiced more or less in the United States, but in England it still holds an honored place on the calendar of sports and pastimes. Major Farley, of Belleville, Ont., recently won the gold medal in competition with the best archers in England and Scotland at London. At Bath he won the championship of the West of England, receiving a gold medal and a magnificent challenge trophy. In another competition at Bath, Major Farley won the special prize donated by the mayor of the city. The Grand National was shot for at Oxford where the Canadian archer was also victorious, winning a huge challenge trophy and a gold medal four inches in diameter, which dates back almost one hundred years. Various other competitions were won by Major Farley while abroad.

Tells Why He Can Now Eat Hearty

"A letter which I read in the paper about Carter's Little Liver Pills fitted my own case so closely that I could not help trying them and am very happy I did." So writes Mr. Frank J. Trumbull of Jersey City, N. J., whose letter goes on to say, "I had heard about Carter's Little Liver Pills for years but never knew they helped overcome poor appetite and sour stomach, until I read about another man in the same plight who took Carter's with good results. I tried them and can honestly say that they freed me of nasty gas on stomach, so that I can now eat without getting bilious, and they improved my appetite fully 100%. You can rest assured that from now on I will boost Carter's Little Liver Pills whenever I can."

Recommended and for sale by all drug stores.

BAREE, SON OF KAZAN

by James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BAREE, SON OF KAZAN," a Vitagraph Picture, With Wolf, the War Dog, Is an Adaptation of This Story

SYNOPSIS

Nepecese, the Indian princess, in trying to lure the dog, Baree, from under the boulder where he sought to hide, was caught by the moving stone and screamed in terror. Her father, Pierrot, the French-Indian trapper, rescued her. Before that Nepecese had gone close enough to Baree to stroke him, and he found she was a friend, not an enemy. But Baree was still young and untamed and again he fled, for the sight of human beings was still strange to him.

CHAPTER X.

Just as in the life of every man there is one big, controlling influence, either for good or bad, so in the life of Baree the beaver-pond was largely an arbiter of destiny. Where he might have gone if he had not discovered it, and what might have happened to him, are matters of conjecture. But it held him. It began to take the place of the old windfall, and in the beavers themselves he found a companionship which made up, in a way, for his loss of the protection and friendship of Kazan and Gray Wolf.

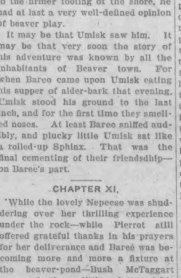
During this fortnight that followed Beaver-tooth's exploit on the dam Baree ate his meals a mile up the creek, where there were plenty of crawfish. But the pond was home. Night always found him there, and a large part of his day. He slept at the end of the dam, or on top of it on particularly clear nights, and the beavers accepted him as a permanent guest. They worked in his presence as if he did not exist.

One afternoon, when the toboggan was particularly wet and slippery from recent use, Baree went up the beaver-path to the top of the bank, and began investigating. Nowhere had he found the beaver-smell so strong as on the slide. He began sniffing and incautiously went too far. In an instant his feet shot out from under him, and with a single wild yelp he went shooting down the toboggan. For the second time in his life he found himself struggling under water, and when a minute or two later he dragged himself up through the soft mud to the firmer footing of the shore, he had at last a very well-defined opinion of beaver play.

It may be that Umisk saw him. It may be that very soon the story of his adventure was known by all the inhabitants of Beaver town. For when Baree came upon Umisk eating his supper of alder-bark that evening, Umisk stood his ground to the last inch, and for the first time they smelled noses. At least Baree sniffed audibly, and plucky little Umisk sat like a rolled-up Sphinx. That was the final cementing of their friendship—on Baree's part.

CHAPTER XI.

While the lovely Nepecese was shuddering over her thrilling experience under the rock—while Pierrot still offered grateful thanks in his prayers for her deliverance and Baree was becoming more and more a fixture at the beaver-pond—Bush McTaggart was perfecting a little scheme of his own up at Post Lac Bain, about forty miles north and west. McTaggart



"After all, was not his power sufficient."

had been factor at Lac Bain for seven years. In the Company's book down in Winnipeg he was counted a remarkably successful man. The expense of his post was below the average, and his semi-annual report of furs always ranked among the first. After his name, kept on file in the main office, was one notation which said: "Gets more out of a dollar than any other man north of God's Lake."

The Indians knew why this was so. They called him Napao Wetikoo—the man-devil. This was under their breath—a name whispered sinisterly in the glow of tepee fires, or spoken softly where not even the winds might carry it to the ears of Bush McTaggart. They feared him; they hated him. They died of starvation and sickness, and the tighter Bush McTaggart clenched the fingers of his iron rule, the more sneekly, it seemed to him, did they respond to his mastery. His was a small soul, hidden in the bulk of a brute, which rejoiced in power. And here—with the raw wilderness on four sides of him—his power knew no end. The Big Company was behind him. It had made him king of a domain in which there was little law except his own. And in return he gave back to the Company bales and bundles of furs beyond their expectation. It was not for them to have suspicions. They were a thousand or more miles away—and dollars counted.

Gregson might have told. Gregson was the investigating Agent of that district, who visited McTaggart once each year. He might have reported that the Indians called McTaggart Napao Wetikoo because he gave them only half price for their furs; he might have told the Company quite plainly that he kept the people of the trap-lines at the edge of starvation through every month of the winter, that he had them on their knees with his hands at their throats—putting the truth in a mild and pretty way—and that he always had a woman or a girl, Indian or halfbreed, living with him at the Post. But Gregson enjoyed his visits too much at Lac Bain. Always he could count on two weeks of coarse pleasures; and in addition to that, his own women-folk at home were a rich treasure of fur that came to them from McTaggart.

One evening, a week after the adventure of Nepecesé and Baree under the rock, McTaggart sat under the glow of an oil lamp in his "office." He had sent his little pippin-faced English clerk to bed, and he was alone. It was just six weeks ago that Pierrot had brought Nepecese on her first visit to Lac Bain since McTaggart had been factor there. She had taken his breath away. Since then he had been able to think of nothing but her. Twice in that six weeks he had gone down to Pierrot's cabin. Tomorrow he was going again. Marie, the slim Cree girl over in his cabine, he had forgotten—just as a dozen others before Marie had slipped out of his memory. It was Nepecese now. He had never seen anything quite so beautiful as Pierrot's girl.

Audibly he cursed Pierrot as he looked at a sheet of paper under his hand, on which for an hour or more he had been making notes out of worn and dusty Company ledgers. It was Pierrot who stood in his way. Pierrot's father, according to those notes, had been a full-blooded Frenchman. Therefore Pierrot was half French, and Nepecese was quarter French—though she was so beautiful he could have sworn there was not more than a drop or two of Indian blood in her veins. If they had been all Indian—Chippewayan, Cree, Ojibway, Dog Rib—anything—there would have been no trouble at all in the matter. He would have bent them to his power, and Nepecese would have come to his cabin, as Marie came six months ago. But there was the accursed French of it! Pierrot and Nepecese were different. And yet——

He smiled grimly, and his hands clenched tighter. After all, was not his power sufficient? Would even Pierrot dare stand against that? If Pierrot objected he would drive him from the country—from the trapping regions that had come down to him as heritage from father and grandfather, and even before their day. He would make Pierrot a wanderer and an outcast, as he had made wanderers and outcasts of a score of others who had lost his favor. No other Post would sell to or buy from Pierrot if Le Beta—the black cross—was put after his name. That was his power—a law of the Factors that had come down through the centuries. It was a tremendous power for evil. It had brought him Marie, the slim, dark-eyed Cree girl, who hated him—and in spite of her hatred "kept house for him." That was the polite way of explaining her presence if explanations were ever necessary.

McTaggart looked again at the notes he had made on the sheet of paper. Pierrot's trapping-country, his own property according to the common law of the wilderness, was very valuable. During the last seven years he had received an average of a thousand dollars a year for his furs, for McTaggart had been unable to cheat Pierrot quite as completely as he had cheated the Indians. A thousand dollars a year! Pierrot would think twice before he gave that up. McTaggart chuckled as he crumpled the paper in his hand and prepared to put out the light. Under his close-cropped shaggy beard his reddish face blazed with the fire that was in his blood. It was an unpleasant face—like iron, merciless, filled with the look that gave him his name of Napao Wetikoo. His eyes gleamed, and he drew a quick breath as he put out the light.

(To be continued.)

Siamese Drawing Color Line

King Has Advised Subjects Against Inter-Marriage With Europeans

The King of Siam, according to Bangkog advices, is drawing the color line in marriages of his subjects. He wrote in a letter to Siamese students in England:

"Do not marry Europeans at any cost. We know of numerous cases where our countrymen have taken white women as their wives, but we have never heard of any mixed marriages with happy results. Do not scorn your countrymen and recall that neither the Siamese nor the English respect a person married outside their own race."

NO BETTER MEDICINE FOR LITTLE ONES

Is What Thousands of Mothers Say of Baby's Own Tablets

A medicine for the baby, or growing child—one that the mother can feel sure is absolutely safe as well as efficient—is found in Baby's Own Tablets. The Tablets are praised by thousands of mothers throughout the country. These mothers have found by actual experience that there is no other medicine for little ones to equal them. Once a mother has used them for her child'ren she will use nothing else. Concerning them Mrs. Charles Hutt, Tancook Island, N.S., writes: "I have ten children, the baby being just six months old. I have used Baby's Own Tablets for them for the past 10 years and can truthfully say that I Know of no better medicine for little ones. I always keep a box of the Tablets in the house and would advise all other mothers to do so."

Baby's Own Tablets are sold by all medicine dealers or will be mailed upon receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont. A little booklet, "Care of the Baby in Health and Sickness," will be sent free to any mother on request.

Vancouver Forges Ahead

Building totals for Vancouver during August approximated $500,000, more than double the total for the corresponding month of 1924. A feature of that month's building figures was the fact that the bulk of the total is made up of smaller amounts, such as dwellings, garages, repairs and alterations.

It has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Eclectric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

The men and women who are lifting the world upward and onward are those who encourage more than critcize.

Minard's Liniment for Colds

Harry: "I bet I can make a worse face than you can."

Dorothy: "You ought to be able to. Look at the face you've got to start with."

Worms in children, if they are not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

Oil From Potatoes

Thin oil is being extracted by a simple process from spoiled potatoes in Australia. It is claimed that the oil is of special value in lubricating delicate mechanisms, such as certain scientific instruments. Having a low freezing point, it may be used for the engines and instruments of aeroplanes.

Minard's Liniment for Sprains and Bruises

HER NERVES BETTER NOW

Received Much Benefit by Taking Lydia E. Pinkham's Vegetable Compound

Chatham, Ontario.—"I started to get weak after my second child was born, and kept on getting worse until I could not do my own housework and was so bad with my nerves that I was afraid to stay alone at any time. I had a girl working for me a whole year before I was able to keep anything again. Through a friend I learned of Lydia E. Pinkham's Vegetable Compound and took four bottles of it. I gave birth to a baby boy the 4th day of September, 1922. I am still doing my own work and washing. Of course, I don't feel well every day because I don't get my rest as the baby is so cross. But when I get my rest I feel fine. I am still taking the Vegetable Compound and am going to keep on with it until cured. My nerves are a lot better since taking it. I can stay alone day or night and not be the least frightened. You can use this letter as a testimonial and I will answer letters from women asking about the Vegetable Compound." —Mrs. CHARLES CARSON, 27 Forsythe Street, Chatham, Ontario.

Mrs. Carson is willing to write to any girl or woman suffering from female troubles.

Mix Mustard this way

Mix Keen's Mustard with water to the consistency of a thick paste. Add water until the desired thickness is obtained. If a milder flavor is desired mix with milk. Mix mustard freshly for every meal.

but it must be Keen's 231

Can You Afford To Lose?

THE LAW OF AVERAGE SAYS "99 ½ OUT OF 100 FAIL"

Why Buy Speculative Securities That Have No Earning Record And No Market Value When You Can Avail Yourself Of Our

PAY IN A YEAR PLAN

Which Enables You To Buy Sound And Seasoned Securities That Have Long-Established Dividend Records And A Very Active Market At All Times. Small Or Large Accounts Accepted.

$500 Invested With Us On Our PAY IN A YEAR PLAN Will Buy For Your Investment Account:

5 SHARES	Bell Telephone, Common	-	$705	PAYING 5.6 %
10 "	Canadian Car Foundry, Pref.		$800	" 8.9 %
10 "	Steel Of Canada, Common	-	$890	" 7.5 %

Above Securities Possess An Unusual Degree Of Safety Plus Extraordinary Profit Making Possibilities. Assuming The Market On Above Shares Advances 20 Points, Profit On Your Initial Investment Would Be $500 Plus All Dividends.

Bees Drive People From Church

Almost 500 Lbs. Of Honey Taken From Between Walls

Bees took possession of Old Bethel Church, near Excelsior Springs, Mo., again recently, and drove out the congregation, just as in former years. This exasperated the congregation so much they made a determined drive on the uninvited guests. Four boys were engaged to assist the attack. A part of the weather-boarding was removed and after "lulling" the bees and removing a few more planks, the boys found that the entire space between the two walls on one side of the church was filled with honey. Later they discovered that the entire space between the walls at one end of the church was almost filled. Almost five hundred pounds was taken out and divided equally between the boys and the church. Word has gone out that the bees must go.

From a boy's essay: "The Sphinx is a woman with a great head. She hasn't talked for 3,000 years."

The first steamer of the Swiss navy was built 97 years ago by an American, Edward Church, who then was the United States consul in France.
